Chronological Domino Flowchart

***Task:** The historical events below are out of order. Read them carefully, then use your pen to **draw arrows connecting the boxes** in the correct chronological and causal order (Event A → Event B → Event C...).*

In the mid-15th century, German goldsmith Johannes Gutenberg developed the movable type printing press in Mainz. This invention sparked a massive transformation in Europe by making the replication of texts fast and affordable:

- Before the press, books were copied by hand, meaning they were rare, expensive, and mostly owned by the Church.
- The printing press allowed ideas (scientific, religious, and political) to spread quickly across national borders.
- It directly supported the spread of Protestant ideas during the Reformation.

Knowledge Check

Q1. Who is credited with inventing the movable type printing press in Europe?
