Medieval Medicine (c1250–c1500): Timeline Knowledge Dump

Task: Place the historical events, keywords, and individuals from the Word Bank onto the blank timeline below in the correct chronological order. Write a brief sentence explaining the significance of each.

Word Bank

Miasma

Hippocrates

Astrology

Apothecary

Bloodletting

The Black Death (1348)

The Church

Physician

Claudius Galen

Roger Bacon

The Four Humours

Part 1: Who Am I?

Read the significance below and retrieve the correct historical individual from memory.

"Known as the 'Father of Medicine'. He created the Theory of the Four Humours, established the Hippocratic Oath, and pioneered clinical observation (observing patient symptoms rather than consulting astrology)."

Name: _____

"Developed the Theory of Opposites based on the Four Humours. His anatomical writings, though often based on animal dissection and highly flawed, were promoted by the Catholic Church and formed the absolute basis of medical training for over 1,000 years."

Name: _____

"An English philosopher and Franciscan friar who emphasized the study of nature through empirical observation. He was imprisoned by Church leaders for suggesting that doctors should conduct their own independent experiments."

Name: _____

Part 2: Connecting the Dots

Explain the relationship or connection between the two historical individuals below. Did they influence each other? Prove each other wrong?

Connection: Hippocrates & Roger Bacon

(Explain their relationship here...)

Part 3: Significance Ranking

Rank the following individuals from 1 (Most Significant) to 3 (Least Significant) regarding their impact on medicine. Then, write a paragraph justifying your #1 choice.

Individuals to Rank:

- Hippocrates
- Claudius Galen
- Roger Bacon

Your Rankings:

1. _____

2. _____

3. _____

Justification for #1:

Renaissance Medicine (c1500–c1700): Timeline Knowledge Dump

Task: Place the historical events, keywords, and individuals from the Word Bank onto the blank timeline below in the correct chronological order. Write a brief sentence explaining the significance of each.

Word Bank

Andreas Vesalius

William Harvey

Dissection

The Great Plague (1665)

Thomas Sydenham

Printing Press

Anatomy

Theory of Opposites

The Royal Society

Part 1: Who Am I?

Read the significance below and retrieve the correct historical individual from memory.

"A Renaissance physician who published "On the Fabric of the Human Body" (1543). By performing his own human dissections, he proved over 300 errors in Galen's work (e.g., proving the human jaw bone is one piece, not two)."

Name: _____

"An English physician who discovered the full circulation of blood in the human body. By dissecting cold-blooded animals and experimenting with ligatures, he proved the heart acts as a pump, disproving Galen's theory that blood was constantly manufactured in the liver."

Name: _____

"A highly influential English physician of the 17th century. He strongly advocated for the direct observation of patient symptoms and classifying diseases (like measles and scarlet fever) into distinct groups, moving away from the Theory of the Four Humours."

Name: _____

Part 2: Connecting the Dots

Explain the relationship or connection between the two historical individuals below. Did they influence each other? Prove each other wrong?

Connection: Thomas Sydenham & Andreas Vesalius

(Explain their relationship here...)

Part 3: Significance Ranking

Rank the following individuals from 1 (Most Significant) to 3 (Least Significant) regarding their impact on medicine. Then, write a paragraph justifying your #1 choice.

Individuals to Rank:

- Andreas Vesalius
- William Harvey
- Thomas Sydenham

Your Rankings:

1. _____

2. _____

3. _____

Justification for #1:

18th & 19th Century (c1700–c1900): Timeline Knowledge Dump

Task: Place the historical events, keywords, and individuals from the Word Bank onto the blank timeline below in the correct chronological order. Write a brief sentence explaining the significance of each.

Word Bank

Louis Pasteur

Germ Theory (1861)

Joseph Lister

Edward Jenner

Florence Nightingale

Edwin Chadwick

Vaccination (1796)

Chloroform

Robert Koch

Public Health Act (1875)

James Simpson

Spontaneous Generation

John Snow

Cholera (1854)

Wilhelm Roentgen

Broad Street Pump

Carbolic Acid

Part 1: Who Am I?

Read the significance below and retrieve the correct historical individual from memory.

"An English country doctor who discovered the first successful vaccine in 1796. After observing that milkmaids who caught cowpox never caught smallpox, he deliberately infected a boy with cowpox to successfully immunize him against the deadly smallpox virus."

Name: _____

"A social reformer who published his famous 'Report on the Sanitary Conditions of the Labouring Population' in 1842. His work proved the link between extreme poverty, filth, and disease, leading to the first Public Health Act of 1848."

Name: _____

"A pioneering British surgeon who proved that cholera was a waterborne disease. During the 1854 Soho outbreak, he mapped out the deaths and traced the source to a contaminated public water pump on Broad Street, famously removing its handle to stop the epidemic."

Name: _____

"A legendary nurse who drastically reduced death rates at the Scutari hospital during the Crimean War (1854) by implementing strict hygiene and sanitation standards. She later published 'Notes on Nursing' and established professional training for nurses."

Name: _____

Part 2: Connecting the Dots

Explain the relationship or connection between the two historical individuals below. Did they influence each other? Prove each other wrong?

Connection: Joseph Lister & Louis Pasteur

(Explain their relationship here...)

Part 3: Significance Ranking

Rank the following individuals from 1 (Most Significant) to 9 (Least Significant) regarding their impact on medicine. Then, write a paragraph justifying your #1 choice.

Individuals to Rank:

- Edward Jenner
- Edwin Chadwick
- John Snow
- Florence Nightingale
- James Simpson
- Louis Pasteur
- Joseph Lister
- Robert Koch
- Wilhelm Roentgen

Your Rankings:

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____

Justification for #1:

Modern Medicine (c1900–present): Timeline Knowledge Dump

Task: Place the historical events, keywords, and individuals from the Word Bank onto the blank timeline below in the correct chronological order. Write a brief sentence explaining the significance of each.

Word Bank

DNA Structure (1953)

James Watson

Francis Crick

Clean Air Acts

Magic Bullets

Sahachiro Hata

Marie Curie

Gerhard Domagk

Penicillin

Rosalind Franklin

Ernst Chain

Alexander Fleming

Electron Microscope

Paul Ehrlich

Howard Florey

Salvarsan 606

Karl Landsteiner

The NHS (1948)

Mass Production

Part 1: Who Am I?

Read the significance below and retrieve the correct historical individual from memory.

"A former student of Robert Koch who theorized the existence of "magic bullets" — chemical compounds that could target and destroy specific disease microbes inside the body without harming the rest of the patient. He co-discovered Salvarsan 606."

Name: _____

"A brilliant researcher who worked with Paul Ehrlich. In 1909, while meticulously re-testing hundreds of failed chemical compounds, Hata discovered that the 606th compound (Salvarsan 606) successfully cured the deadly disease syphilis, creating the world's first magic bullet."

Name: _____

"Discovered the second magic bullet in 1932. He found that a red chemical dye called Prontosil effectively cured blood poisoning (streptococcus) in mice. He later bravely used it to successfully cure his own daughter's severe infection, proving its efficacy in humans."

Name: _____

"Accidentally discovered Penicillin in 1928 after returning from a holiday to find that a mysterious mould (Penicillium notatum) had grown in a neglected petri dish and killed the surrounding staphylococcus bacteria."

Name: _____

Part 2: Connecting the Dots

Explain the relationship or connection between the two historical individuals below. Did they influence each other? Prove each other wrong?

Connection: Gerhard Domagk & Ernst Chain

(Explain their relationship here...)

Part 3: Significance Ranking

Rank the following individuals from 1 (Most Significant) to 11 (Least Significant) regarding their impact on medicine. Then, write a paragraph justifying your #1 choice.

Individuals to Rank:

- Paul Ehrlich
- Sahachiro Hata
- Gerhard Domagk
- Alexander Fleming
- Howard Florey
- Ernst Chain
- James Watson
- Francis Crick
- Rosalind Franklin
- Karl Landsteiner
- Marie Curie

Your Rankings:

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
11. _____

Justification for #1:
