### THE 3 WRITING MILESTONES EXPLAINED:

- **Bronze (Accessible Milestone / Grade 4–5):** Complete 1 structured PEEL paragraph using the evidence gathered from Page 1. Clearly states claim, historical fact, and direct causal explanation (8–10 lines).
- **Silver (Standard Milestone / Grade 6–7):** Complete 2 balanced paragraphs comparing competing factors using causal connectives (*Consequently, However, This directly triggered*) (14–16 lines).
- **Gold (Scholarship Milestone / Grade 8–9):** Full multi-paragraph essay reaching a substantiated, evaluative verdict using the historical criteria (Scale, Duration, Transformation, NOP) (18–20 lines).

# CURRICULUM ROADMAP & CHRONOLOGICAL SPINE

1750 – 1900

Follow Britain's dual transformation: the domestic industrial revolution at home and the expansion of imperial power abroad.

|                  |                                                                                                                                                                   |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1769–1784</b> | <b>The Energy &amp; Materials Revolution</b><br>Watt patents separate steam condenser (1769); Cort patents puddling & rolling at Funtley (1783–84).               |
| <b>1780–1830</b> | <b>The Rise of the Factory System</b><br>Water frames and steam looms concentrate workers into textile cities; domestic system collapses.                         |
| <b>1815–1819</b> | <b>Post-Napoleonic Distress &amp; Peterloo</b><br>Corn Laws spark starvation; 60,000 peaceful reformers charged by cavalry at St Peter's Field (1819).            |
| <b>1832–1848</b> | <b>The Struggle for Parliamentary Voice</b><br>Great Reform Act enfranchises middle class (1832); Chartists present million-signature petitions (1838–48).        |
| <b>1842–1858</b> | <b>Urban Crisis &amp; Public Health Reform</b><br>Chadwick exposes slum death rates (1842); King Cholera epidemics lead to the Great Stink & Bazalgette (1858).   |
| <b>1857–1858</b> | <b>The Indian Rebellion &amp; Crown Rule</b><br>Uprising in Meerut shatters East India Company control; Queen Victoria assumes direct Crown sovereignty (1858).   |
| <b>1870–1900</b> | <b>High Imperialism &amp; The Global Balance Sheet</b><br>Scramble for Africa; Victorian cultural propaganda contrasts against domestic working-class inequality. |

## Hampshire Local History Connection:

Our curriculum directly anchors national events into our local Hampshire landscape: from **Henry Cort's surviving puddling weir and slag wall at Funtley**, to **Fareham Red brick clay pits**, and the **Portsmouth Royal Navy Dockyard** industrial complex.

Turn overleaf to begin **Lesson 1 (Pages 4–5 Facing Spread)** →

# L1: What powered the Industrial Revolution, and how did a Fareham ironmaster change the world?

EVIDENCE LAUNCH

CORE LEARNING OBJECTIVES:

- Explain how coal and Watt's steam engine replaced the domestic system and water power.
- Analyse how Henry Cort's puddling and rolling processes at Funtley transformed brittle pig iron into tough naval wrought iron, evaluating surviving physical archaeology along the River Meon.
- Evaluate the relative importance of Portsmouth Dockyard's location versus technological genius in Cort's success.

DO NOW: SPACED RETRIEVAL GRID

Prior Units & Recall

1. Last Lesson:

What military structure did William the Conqueror build across England after 1066 to intimidate the Anglo-Saxons?

.....

2. Two Lessons Ago:

What deadly pandemic struck England in 1348, wiping out over a third of the population?

.....

3. Prior Unit (Medieval/Tudor):

What religious movement did Martin Luther launch in 1517 that divided European Christianity?

.....

4. Big Picture / Chronology:

What major naval invasion fleet sent by Philip II of Spain was defeated by England in 1588?

.....

DISCIPLINARY VOCABULARY MASTERY

Dual-Term Check

**Industrial Revolution:** The rapid transformation of manufacturing, transportation, and daily life driven by coal, steam, and iron from 1750.

**Domestic System:** The traditional method of handcrafting textiles and goods at home using muscle, wind, or seasonal water power.

TASK 4: DRAW & LABEL HENRY CORT'S REVERBERATORY PUDDLING FURNACE & GROOVED ROLLERS (1784)

THE PREPARATION BRIDGE

Sketch Cort's puddling process and grooved rolling mill in the canvas below. Use the faint ghost diagram as your visual anchor. You must label and annotate the 4 mandatory features.

**Required Annotations:** ① *Firebox* (separating raw coal from metal) • ② *Arched masonry roof* (reflecting heat down) • ③ *Puddling bar* (worker stirring out carbon) • ④ *Grooved rollers* (compressing out slag)

*Low-Floor Clue:* Notice how the coal fuel never touches the iron directly—only the reverberating heat melts the metal, keeping it free of brittle sulphur.

★ **Scholar's Edge:** Why did Britain's ability to mass-produce coal-fired wrought iron give it an insurmountable naval advantage over timber-dependent France?

## L2: Was industrial work progress or punishment?

EVIDENCE LAUNCH

### CORE LEARNING OBJECTIVES:

- Explain how steam-powered factories replaced domestic handcraft with machine discipline and child exploitation.
- Analyse how the Fareham Red Brick Boom connected local Hampshire clay pits to national imperial architecture like the Royal Albert Hall.
- Evaluate whether the Industrial Revolution was primarily human punishment or societal progress using the Optimist vs. Pessimist debate.

### DO NOW: SPACED RETRIEVAL GRID

Prior Units &amp; Recall

#### 1. Last Lesson:

What Hampshire ironworks did Henry Cort lease in 1775 to develop his naval iron innovations?

.....

.....

#### 2. Two Lessons Ago:

What two metallurgical processes did Henry Cort patent in 1783–1784 that transformed brittle pig iron into tough naval wrought iron?

.....

.....

#### 3. Prior Unit (Medieval/Tudor):

Why was Portsmouth Royal Navy Dockyard the primary customer for Henry Cort's iron?

.....

.....

#### 4. Big Picture / Chronology:

Which Scottish engineer patented the separate condenser in 1769, allowing steam engines to produce rotary motion anywhere coal was available?

.....

.....

### DISCIPLINARY VOCABULARY MASTERY

Dual-Term Check

**Fareham Reds:** Famous, durable red clay bricks manufactured in Fareham and used in buildings across the Victorian Empire, including the Royal Albert Hall.

**Pug Mill:** A horse- or steam-driven machine with rotating blades used to grind and mix raw clay with water.

### TASK 4: THE BALANCE SHEET OF INDUSTRIAL LABOUR: PROGRESS VS. PUNISHMENT

THE PREPARATION BRIDGE

Complete the two-column forensic ledger below, directly contrasting the factory owner's argument for progress against the worker's lived reality.

#### The Optimist Case (Industrial Progress)

- Higher nominal cash wages compared to farm labour.
- Production of cheap, machine-made cotton & iron goods.
- Breakthroughs in steam-powered labour productivity.

.....

.....

.....

#### The Pessimist Case (Human Degradation)

- 14-hour shifts under brutal factory clock surveillance.
- Child labour in Hampshire clay pits & spinning mules.
- Catastrophic occupational deformities & lung disease.

.....

.....

.....

*Low-Floor Clue:* Contrast the clock tower at the mill gates against the freedom of cottage weavers taking "Saint Monday" off.

★ *Scholar's Edge:* E.P. Thompson argued that the factory system was not just an economic change, but a violent psychological assault on human nature. How far do you agree?

## L3: Did industrialisation make British towns unlivable?

### EVIDENCE LAUNCH

#### CORE LEARNING OBJECTIVES:

- Explain how rapid urbanisation, back-to-back housing, and cesspools created lethal conditions in industrial cities.
- Analyse how King Cholera and the 1858 Great Stink shattered laissez-faire ideology, leading to Bazalgette's sewer network.
- Evaluate the historical debate between Optimists and Pessimists regarding the living standards of the Victorian working class.

#### DO NOW: SPACED RETRIEVAL GRID

Prior Units &amp; Recall

##### 1. Last Lesson:

What Fareham ironmaster patented the revolutionary puddling and rolling processes in 1783–1784?

.....

.....

##### 2. Two Lessons Ago:

What was the decisive metallurgical difference between brittle pig iron and tough wrought iron?

.....

.....

##### 3. Prior Unit (Medieval/Tudor):

Name the local Hampshire geological clay formation that allowed Fareham to manufacture over 20 million bricks annually.

.....

.....

##### 4. Big Picture / Chronology:

What landmark 1832 parliamentary report documented 14-hour working days and corporal strapping of children in northern textile mills?

.....

.....

#### DISCIPLINARY VOCABULARY MASTERY

Dual-Term Check

**Urbanisation:** The rapid migration of rural populations into towns and cities, creating vast, overcrowded industrial metropolitan centers.

**Laissez-faire:** The political and economic doctrine that governments should not interfere in business, private housing, or municipal sanitation.

#### TASK 4: INTERROGATING CHADWICK'S 1842 REPORT ON THE SANITARY CONDITION OF THE LABOURING POPULATION

**THE PREPARATION  
BRIDGE**

1. Underline the shocking statistical comparison Chadwick uses to provoke Parliament.
2. In the lines below, explain why an historian must consider Chadwick's utilitarian motive when judging the accuracy of these figures:

*"The annual loss of life from filth and bad ventilation are greater than the loss from death or wounds in any modern war. In the cellar dwellings of Manchester and Leeds, human excrement oozes through walls, and whole families sleep upon damp dung. The average age at death of the working class in Manchester is 17 years, compared to 38 years for the rural gentry."*

.....

.....

.....

.....

*Low-Floor Clue:* Notice the comparison between industrial disease and military warfare—why would a government official frame it this way?

★ **Scholar's Edge:** How did the persistent belief in the "miasma theory" (bad air) both motivate sanitary reform and delay the scientific eradication of waterborne cholera?

# L4: How was the British Empire built and sustained?

EVIDENCE LAUNCH

CORE LEARNING OBJECTIVES:

- Explain how mercantilist trade networks and the East India Company extracted wealth and raw materials.
- Analyse how Portsmouth Royal Dockyard and steam industrial technology sustained the Royal Navy's global supremacy.
- Evaluate the impact of British imperial rule on colonized peoples, contrasting corporate profits with indigenous de-industrialisation.

DO NOW: SPACED RETRIEVAL GRID

Prior Units & Recall

1. Last Lesson:

What lethal waterborne bacterial disease caused four major epidemics in 19th-century British industrial towns?

.....

.....

2. Two Lessons Ago:

What was the erroneous Victorian medical theory that epidemic diseases were caused by poisonous foul air?

.....

.....

3. Prior Unit (Medieval/Tudor):

What 1858 environmental disaster in London forced Parliament to abandon laissez-faire and fund modern sewers?

.....

.....

4. Big Picture / Chronology:

Who was the chief civil engineer who designed London's revolutionary 1,100-mile underground intercepting sewer network?

.....

.....

DISCIPLINARY VOCABULARY MASTERY

Dual-Term Check

**Mercantilism:** An economic doctrine holding that colonies exist strictly to enrich the mother country by supplying cheap raw materials and buying manufactured goods.

**East India Company:** A private British joint-stock commercial corporation granted a royal monopoly to conquer, govern, and extract taxes from the Indian subcontinent.

TASK 4: PILLARS OF IMPERIAL DOMINANCE: THE ROYAL NAVY VS. CHARTERED MONOPOLIES

THE PREPARATION  
BRIDGE

Complete the comparative analysis below evaluating the two main drivers of British imperial expansion.

| Dimension         | The Royal Navy (Portsmouth Complex)                   | Chartered Trade (East India Company)                |
|-------------------|-------------------------------------------------------|-----------------------------------------------------|
| Strategic Purpose | Global command of sea lanes & military deterrence.    | Commercial extraction of silk, spices, tea & opium. |
| Key Mechanism     | Industrial dockyards, steam frigates, global coaling. | Private corporate armies, tax collection (Diwani).  |
| Vulnerability     | Massive state tax burden & naval timber shortages.    | Corporate corruption & indigenous armed rebellion.  |

**Synthesis:** In 3–4 sentences, explain which pillar was more essential for maintaining global dominance between 1750 and 1850:

.....

.....

.....

★ **Scholar's Edge:** Did the British Empire acquire its global territories through a coherent grand strategy, or "in a fit of absence of mind" (Sir John Seeley)?

## Enquiry: Was the expansion of the British Empire primarily driven by naval military power or commercial profit?

EXTENDED WRITING

### 1. FACTOR 1: NAVAL SUPREMACY

Argue that the Royal Navy (dockyards at Portsmouth, global coaling stations, global blockades) provided the indispensable military backbone.

### 2. FACTOR 2: COMMERCIAL CAPITAL

Argue that chartered monopolies (East India Company), transatlantic triangular trade profits, and merchant capital drove conquest.

### 3. RELATIVE WEIGHTING

Reach a definitive verdict: did military might enable commercial trade, or did mercantile profit finance naval supremacy?

**Academic Connective Bank:** On one hand, naval supremacy was the primary driver because... • Crucially, this was demonstrated by... • Conversely, commercial capital acted as the true catalyst... • Ultimately, naval power was merely the instrument, whereas...

**Bronze Target (8–10 lines):** 1 complete PEEL paragraph using evidence from Page 10.

**Silver (14–16 lines):** 2 balanced paragraphs with connectives.

**Gold (18–20 lines):** Sustained evaluative verdict using criteria.

**Teacher Assessment:** Effort: [ 1 • 2 • 3 • 4 ] | Subject Knowledge: [ 1 • 2 • 3 • 4 ] | Disciplinary Analysis: [ 1 • 2 • 3 • 4 ]

**Milestone Achieved:** [ ] Bronze [ ] Silver [ ] Gold

## L5: How did the Empire strike back? The 1857 Indian Rebellion

EVIDENCE LAUNCH

### CORE LEARNING OBJECTIVES:

- Explain the deep structural grievances (Doctrine of Lapse, taxation) and immediate spark (Enfield rifle) of the 1857 uprising.
- Analyse the major turning points, including the capture of Delhi, the leadership of Rani Lakshmibai, and the brutality of reprisals.
- Evaluate the historiographical debate between colonial British and modern Indian interpretations of the rebellion.

### DO NOW: SPACED RETRIEVAL GRID

Prior Units &amp; Recall

#### 1. Last Lesson:

What private joint-stock corporation ruled vast territories of India and maintained its own army until 1858?

.....

.....

#### 2. Two Lessons Ago:

What Hampshire naval facility was the largest industrial manufacturing complex in the 19th-century world?

.....

.....

#### 3. Prior Unit (Medieval/Tudor):

Name Britain's revolutionary 1860 iron-hulled warship that made wooden fleets obsolete overnight.

.....

.....

#### 4. Big Picture / Chronology:

What economic term describes the destruction of India's handloom weaving industry by cheap British factory cloth?

.....

.....

### DISCIPLINARY VOCABULARY MASTERY

Dual-Term Check

**Sepoy:** An Indian soldier trained, armed, and employed within the private military forces of the British East India Company.

**Doctrine of Lapse:** An aggressive annexation policy by Lord Dalhousie allowing the British to seize any Indian princely state whose ruler died without a direct biological male heir.

### TASK 4: INTERROGATING THE REBEL MOTIVATION: THE 1857 AZAMGARH PROCLAMATION

THE PREPARATION  
BRIDGE

1. Underline the economic and religious grievances listed by the rebel leadership.
2. In the lines below, explain what this proclamation reveals about the diverse groups uniting against British rule:

*"Both Hindus and Muslims are being ruined under the tyranny and oppression of the treacherous English. The British have subverted our religion, impoverished our artisans with foreign machine goods, and dispossessed our ancient landed nobility. Arise, then, and rally under the Imperial banner to defend your faith and ancestral lands!"*

.....

.....

.....

.....

.....

*Low-Floor Clue:* Look at who is addressed—is this just soldiers complaining about rifle grease, or something much broader?

★ **Scholar's Edge:** Why did British colonial authorities deliberately label the 1857 conflict a "Sepoy Mutiny" rather than a war of national independence?

## Enquiry: Explain the sequence of events that transformed a military mutiny in Meerut into the 1857 Indian Rebellion.

EXTENDED WRITING

### 1. PRECONDITION & TRIGGER

Analyse how long-term annexation grievances (Doctrine of Lapse) and religious fears were ignited by the Enfield rifle cartridge crisis.

### 2. ESCALATING SPREAD

Explain the critical pivot: the march to Delhi, the restoration of Bahadur Shah II, and the widespread civilian uprisings across Awadh.

### 3. OUTCOME & LEGACY

Explain the decisive resolution: brutal British military suppression, the dismantling of the EIC, and direct Victorian Crown rule (1858).

**Academic Connective Bank:** The initial crisis was precipitated by... • This immediately escalated when... • The decisive turning point occurred with... • Consequently, this compelled the British Crown to...

**Bronze Target (8–10 lines):** 1 complete PEEL paragraph using evidence from Page 12.

**Silver (14–16 lines):** 2 balanced paragraphs with connectives.

**Gold (18–20 lines):** Sustained evaluative verdict using criteria.

**Teacher Assessment:** Effort: [ 1 • 2 • 3 • 4 ] | Subject Knowledge: [ 1 • 2 • 3 • 4 ] | Disciplinary Analysis: [ 1 • 2 • 3 • 4 ]

**Milestone Achieved:** [ ] Bronze [ ] Silver [ ] Gold

## L6: How did ordinary people fight for a voice?

EVIDENCE LAUNCH

### CORE LEARNING OBJECTIVES:

- Explain the causes and violent aftermath of the 1819 Peterloo Massacre and the repressive Six Acts.
- Analyse the Hampshire Swing Riots of 1830 and the legal trial of the 1834 Tolpuddle Martyrs.
- Evaluate the methods and historical legacy of the Chartist movement between 1838 and 1848.

### DO NOW: SPACED RETRIEVAL GRID

Prior Units &amp; Recall

#### 1. Last Lesson:

What new military rifle's greased cartridge sparked the 1857 Indian Rebellion?

.....

.....

#### 2. Two Lessons Ago:

What 250-year-old corporation's rule over India was terminated by Parliament in 1858?

.....

.....

#### 3. Prior Unit (Medieval/Tudor):

Who was the symbolic monarch restored by rebel sepoys in Delhi in May 1857?

.....

.....

#### 4. Big Picture / Chronology:

What female warrior queen became an enduring national legend during the Siege of Jhansi?

.....

.....

### DISCIPLINARY VOCABULARY MASTERY

Dual-Term Check

**Franchise:** The constitutional right to cast a vote in parliamentary or municipal elections.

**Peterloo Massacre:** The violent cavalry charge into a peaceful crowd of 60,000 reform demonstrators at St Peter's Field, Manchester, on 16 August 1819.

### TASK 4: THE CRUCIBLE OF CLASS CONFLICT: REFORMERS VS. THE MANCHESTER MAGISTRATES (1819)

THE PREPARATION  
BRIDGE

Contrast the stated aims of the peaceful working-class crowd against the paranoid fears of the ruling elite at St Peter's Field.

#### The Peaceful Reformers (Henry Hunt)

- Repeal of the hated 1815 Corn Laws causing starvation.
  - Universal male suffrage & annual parliaments.
  - Dressed in Sunday best; women & children present.
- .....
- .....

#### The Manchester Magistrates (Elite Panic)

- Terror of a violent French-style Jacobin revolution.
  - Suspicion of marching drill & revolutionary liberty caps.
  - Immediate panic reading of the Riot Act & cavalry charge.
- .....
- .....

*Low-Floor Clue:* Why were British landowners so petrified of mass gatherings in 1819, just 4 years after the defeat of Napoleon?

★ *Scholar's Edge:* How did the British government's passage of the repressive "Six Acts" in 1819 delay democracy while making future reform inevitable?

Interrogate the magistrates' perspective: wealthy Tory landowners terrified of a British Jacobin revolution following the Napoleonic Wars.

Reach a substantiated judgment: how the magistrates' terrified exaggerations make the report invaluable for understanding elite paranoia.

**Bronze Target (8–10 lines):** 1 complete PEEL paragraph using evidence from Page 14.

**Silver (14–16 lines):** 2 balanced paragraphs with connectives.

Enquiry Write-Up • Genre 6: Source Utility &amp; Forensic Evaluation

## L7: How did the road to democracy expand?

### EVIDENCE LAUNCH

#### CORE LEARNING OBJECTIVES:

- Explain the corruption of the unreformed electoral system (Rotten Boroughs, pocket boroughs, open hustings).
- Analyse the 1832 Great Reform Act as a tactical compromise between aristocrats and the middle class.
- Evaluate how the 1872 Secret Ballot Act and the 1867/1884 Reform Acts laid the foundations for mass democracy.

#### DO NOW: SPACED RETRIEVAL GRID

Prior Units &amp; Recall

##### 1. Last Lesson:

What 1819 event saw 18 peaceful reform demonstrators killed by cavalry sabres in Manchester?

.....

.....

##### 2. Two Lessons Ago:

What mythical leader's name was signed to threatening letters sent by farmworkers smashing threshing machines in Hampshire in 1830?

.....

.....

##### 3. Prior Unit (Medieval/Tudor):

Where were the six Dorset farmworkers known as the Tolpuddle Martyrs transported in 1834?

.....

.....

##### 4. Big Picture / Chronology:

Name the 1838 working-class movement that published a six-point petition demanding universal male suffrage.

.....

.....

#### DISCIPLINARY VOCABULARY MASTERY

Dual-Term Check

**Rotten Borough:** An ancient electoral constituency with a tiny handful of voters (or none at all) that still returned two Members of Parliament to the House of Commons.

**Pocket Borough:** A parliamentary seat completely controlled ("in the pocket of") a single aristocratic patron who dictated who won the election.

#### TASK 4: THE 1832 REFORM CRISIS: FROM ROTTEN BOROUGH TO COMPROMISE

#### THE PREPARATION BRIDGE

undefined

##### 1. The Stagnation (1830)

Rotten boroughs like Old Sarum (3 houses, 2 MPs) hold power, while Birmingham has 0 MPs.

##### 2. The Catalyst (1831)

The House of Lords rejects the Reform Bill, sparking mass riots in Bristol and Nottingham.

##### 3. The Turning Point (May 1832)

The "Days of May": Reformers demand "Stop the Duke, go for Gold", crashing bank reserves.

##### 4. The Concession (June 1832)

King William IV threatens to create 50 Whig peers; the Lords surrender and pass the Act.

**Causal Analysis:** In 3–4 sentences, explain why the threat of financial panic ("Go for Gold") and civil war forced the aristocracy to concede the vote to the middle class:

.....

.....

.....

.....

★ **Scholar's Edge:** Did the 1832 Great Reform Act represent the birth of British democracy, or a cynical aristocratic masterstroke that entrenched property rule?

# L8: Who truly benefited from 19th-century transformation?

EVIDENCE LAUNCH

## CORE LEARNING OBJECTIVES:

- Analyse the "Optimist" argument using quantitative data on wages, public health, and technological innovation.
- Analyse the "Pessimist" argument regarding working-class slum squalor, alienation, and colonial economic extraction.
- Synthesize competing historiographical interpretations into a rigorous, balanced capstone enquiry essay.

## DO NOW: SPACED RETRIEVAL GRID

Prior Units &amp; Recall

### 1. Last Lesson:

What landmark 1832 legislation abolished 56 rotten boroughs and enfranchised the industrial middle class?

.....

.....

### 2. Two Lessons Ago:

What 1872 law introduced private voting booths and printed ballot papers to end intimidation at the hustings?

.....

.....

### 3. Prior Unit (Medieval/Tudor):

What 1842 government report by Edwin Chadwick shocked Victorian society by documenting urban slum conditions?

.....

.....

### 4. Big Picture / Chronology:

Which Fareham ironmaster developed the puddling and grooved rolling processes at Funtley in 1783–1784?

.....

.....

## DISCIPLINARY VOCABULARY MASTERY

Dual-Term Check

**Historiography:** The study of how historical interpretations, perspectives, and debates change over time among different academic historians.

**Optimist School:** Historians (such as T.S. Ashton and Sir John Clapham) who argue that the Industrial Revolution generated net societal progress, higher wages, and civilizational advancement.

## TASK 4: THE GREAT STANDARD OF LIVING DEBATE: OPTIMISTS VS. PESSIMISTS

THE PREPARATION BRIDGE

Complete the historiographical audit below, synthesizing the strongest historical evidence supporting each academic school of thought.

### The Optimist School (e.g. T.S. Ashton, R.M. Hartwell)

- Cheaper mass-produced clothing, soap, tea & railway travel.
  - Eventual rise in real wages after 1850; Factory Act protections.
  - Foundation of modern democratic institutions and medical science.
- .....
- .....
- .....

### The Pessimist School (e.g. E.J. Hobsbawm, E.P. Thompson)

- Brutal destruction of traditional artisan communities and dignity.
  - Catastrophic urban squalor, stunted children, and cholera deaths.
  - Enormous private fortunes accumulated through colonial exploitation.
- .....
- .....
- .....

*Low-Floor Clue:* Distinguish between what happened to the first generation of factory workers (1780–1830) versus their grandchildren (after 1860).

★ **Scholar's Edge:** *Is it historically valid to justify forty years of working-class misery and colonial suffering by pointing to the modern high living standards that eventually followed?*

Present the argument of Hobsbawm & Thompson: catastrophic slum degradation, alienation of labour, colonial drain, and surging inequality.

Reach a mature synoptic verdict: weigh short-term generational catastrophe against long-term structural human progress.

**Gold (18–20 lines):** Sustained evaluative verdict using criteria.

# UNIT KNOWLEDGE VAULT & DISCIPLINARY COMMAND GUIDE

SCHOLAR  
REFERENCE

## KEY HISTORICAL FIGURES

- **James Watt (1736–1819):** Patented the separate condenser steam engine (1769).
- **Henry Cort (1741–1800):** Fareham ironmaster who invented puddling & rolling at Funtley (1783–84).
- **Isambard Kingdom Brunel (1806–1859):** Engineer of Great Western Railway & SS Great Britain.
- **Edwin Chadwick (1800–1890):** Author of landmark 1842 Sanitary Report.
- **Lord Shaftesbury (1801–1885):** Parliamentary champion of Ten Hours Act & Coal Mines Act.
- **Henry Hunt (1773–1835):** Radical orator at the 1819 St Peter's Field rally (Peterloo).
- **Earl Grey (1764–1845):** Whig Prime Minister who steered 1832 Great Reform Act.

## THE 6 GCSE DISCIPLINARY COMMAND WORDS

- 1. Causal Weighting:** Prioritising multiple causes into triggers vs underlying pre-conditions.
- 2. Significance:** Judging historical importance using Scale, Duration, and Transformation.
- 3. Change & Continuity:** Distinguishing between radical turning points and persistent continuities.
- 4. Historiographical Debate:** Weighing competing academic interpretations with evidence.
- 5. Analytical Narrative:** Tracing causal links across an evolving sequence of events without story-telling.
- 6. Source Utility:** Interrogating Content, Context, and Provenance (NOP: Nature, Origin, Purpose).

## Scholar Revision Checklist:
