# The History Department — Quality Assurance & Architecture Manual

Master Quality Control Checklist & Key Stage 3 Scheme of Work

EXECUTIVE REFERENCE

**Architectural Clarification (KS3 vs GCSE):** The History Revision Hub enforces a single, unified pedagogical engine across all units. **KS3 Units (Years 7–9)** are structured around Christine Counsell's 5-Act enquiry sequence (5 enquiries per half-term, 2-page double-spread per enquiry = 16-page master workbook). **GCSE Units (Years 10–11)**, such as Early Elizabethan England (*eee*) and Middle East (*cme_new*), utilize the identical double-page workbook engine and cognitive scaffolding, but are partitioned into Pearson Edexcel Key Topics (KT1, KT2, KT3) rather than single enquiries.

## Master 16-Point Quality Control & Verification Matrix

| # | Audit Gate | Specification Standard | Common Pitfall / Observed Error | Verification Protocol |
|---|---|---|---|---|
| 1 | **5-Act Symmetry** | Exact 1:1 match: 5 app narrative acts = 5 left-hand workbook stages. | 4 acts in app while workbook had 5 steps, or mismatched heading dates. | `verify_workbook_to_app_alignment.cjs` |
| 2 | **KS3 Model Answers** | Exactly 3 developed PEEL paragraphs (~250–350 words total). Accessible for Year 7–9. | University-level 600-word historiographical essays with obscure citations. | Word count audit (250–350 words) & exactly 3 paragraphs. |
| 3 | **Strict Signposting** | Words from question appear TWICE in each paragraph (at start for Point, at end for Link). | Missing question stems in paragraph conclusions, leading to argument drift. | Inspect sentence 1 and final sentence of each PEEL point. |
| 4 | **Zero Giveaways** | Printed workbook stems & connectives must be purely structural (no facts, dates, answers). | Starters revealing answers (e.g. "Furthermore, Article 231 caused hyperinflation..."). | Grep writing frames in `render_*_workbook.cjs` . |
| 5 | **Visual Source Check** | Physical image on disk in public/images/ visually depicts title and caption. | Poster labeled "Scrap of Paper" showing French troops; castle ruins labeled DORA. | Disk presence check + proactive `view_file` inspection. |
| 6 | **How Useful Questions** | Accessible Edexcel-style source utility question with provenance prompts (Author, Audience, Motive). | Generic comprehension ("What does Source A show?") rather than utility evaluation. | Check `tariff: 'How useful'` with provenance scaffolding. |
| 7 | **Quiz Pack PDF Link** | Aligned 20-question (or 70+ master) Quiz Pack PDF generated & linked in unit hero banner. | Dead link or missing PDF in `public/pdfs/` on banner click. | Verify file in `public/pdfs/` & test banner click. |
| 8 | **Hero Banners & Covers** | High-res authentic primary artwork/photos positioned cleanly (center 20%) with informative captions. | Distorted aspect ratios, broken paths, or generic stock graphics. | Inspect `banner.image` & `cover_image` in data.js. |
| 9 | **School Anonymity** | 0 instances of school name, associated school email domains, or teacher surnames. Neutral branding. | Accidental school badge, email, or teacher nameplate on covers or footers. | `node scripts/verify_sanitization.cjs` (100% Clean). |
| 10 | **Universal Page Budget** | Printed 16-page workbooks must enforce 0px overflow and >85% space budget utilization. | Text spilling onto accidental page 17, or dead underflow gaps (>150px) at bottom. | `node scripts/check_overflows.cjs <unit_id>` |
| 11 | **Do Now Recall Rule** | Do Now questions must STRICTLY test recall from previous lessons. Never current lesson. | Asking recall questions about text the student has not yet read in current lesson. | Check `do_now.questions` against previous lessons. |
| 12 | **Rotating Vocab Tasks** | Printed workbooks dynamically rotate across 3 tasks: Cloze, Mapping, and Dual Distinction. | Repeating identical fill-in-the-blank format every lesson, causing pupil fatigue. | Verify `lessonIndex % 3` dynamic rotation in scripts. |
| 13 | **Domino Flowchart** | Timeline Do Nows must render as shuffled Domino Flowchart boxes requiring pupil causal arrows. | Pre-sorted chronological table that removes active cognitive retrieval. | Check `do_now.type === 'timeline'` in workbook template. |
| 14 | **Teacher Notes & Hinge** | Root teacher_notes object with primer, objectives, and every visual source ending with Hinge Question. | Missing teacher notes or source context lacking targeted Hinge Question. | Verify `teacher_notes` & `**Hinge Question:**` blurb. |

| # | Audit Gate | Specification Standard | Common Pitfall / Observed Error | Verification Protocol |
|---|---|---|---|---|
| 15 | **Zero AI Jargon** | Authentic classroom/exam board terminology only. Strictly no corporate buzzwords or AI filler. | Using "Disciplinary Synthesis", "Holistic Framework", or "Specification Mastery". | Grep audit for forbidden marketing buzzwords. |
| 16 | **Strict No AI Images** | Strictly authentic historical photographs and primary source illustrations. Zero AI images. | AI-generated illustrations or fantasy artwork masquerading as historical sources. | `node verify_images.cjs` (100% Clean). |

## 2. "Industrialisation & Empire" Restructuring Blueprint (Splitting the 8-Lesson Monster)

Splitting the 8-lesson unit into two standalone 5-act units resolves the 16-page budget overflow and creates a flawless chronological bridge between **The First British Empire (1600–1783)** and **Causes of the Great War (1871–1914)**:

| Enquiry | Unit A: The Industrial Revolution (1750–1900) [Year 8 Term 3] | Unit B: The Second British Empire (1857–1914) [Year 9 Term 1A] |
|---|---|---|
| **Enq 1** | **What powered the Industrial Revolution?**<br>Henry Cort, puddling process, coal, steam power, ironworks, and the railway network. | **From the Ashes of 1783: How did Britain pivot to a Second Empire?**<br>Post-American Revolution pivot to Asia, Royal Navy Pax Britannica, and commercial trade routes. |
| **Enq 2** | **Was industrial work progress or punishment?**<br>Factory floor discipline, child chimney sweeps and scavengers, textile mills, and Luddite resistance. | **The Jewel in the Crown: How did the East India Company subjugate India?**<br>Robert Clive, Battle of Plassey, exploitation of Mughal fragmentation, and economic extraction. |

| Enquiry | Unit A: The Industrial Revolution (1750–1900) [Year 8 Term 3] | Unit B: The Second British Empire (1857–1914) [Year 9 Term 1A] |
|---|---|---|
| **Enq 3** | **Did industrialisation make British towns unlivable?**<br>Slums, back-to-back housing, open sewers, cholera epidemics, and Edwin Chadwick's public health reform. | **The Empire Strikes Back: Why did the 1857 Indian Rebellion erupt?**<br>Greased cartridges, sepoys, siege of Cawnpore, brutal British retribution, and shift to direct Crown Raj rule. |
| **Enq 4** | **How did ordinary people fight for a voice?**<br>Post-war distress, 1819 Peterloo Massacre, Tolpuddle Martyrs, and the rise of Chartism and the 6 demands. | **The Scramble for Africa: Civilising mission or armed plunder?**<br>Berlin Conference 1884, Maxim guns, rubber/gold syndicates, and the debate between E.D. Morel and Rudyard Kipling. |
| **Enq 5** | **How did the road to democracy expand?**<br>Great Reform Acts 1832/1867/1884, secret ballots, trade unions, and the early women's suffrage movement. | **Who truly benefited from the British Empire?**<br>Synoptic assessment weighing benefits for British industrial elites vs working-class soldiers vs colonized peoples. |
