RESTRICTED ACCESS - MASTER YOUR MEMORY

How to Hack Your Memory

(Rules of Engagement)

1. Never Just Read

Reading the answers feels like learning, but it's an illusion. You must force your brain to struggle to find the answer. The struggle is what builds memory pathways.

2. Cover, Recall, Check

Cover the answer sheet. Write your answer down in the notes section (or say it out loud). Only then are you allowed to check 'The Vault'.

3. Track Your Threat Level

Use the R-A-G (Red, Amber, Green) checkboxes next to every question after you attempt it.

- 🟩 **Green:** I nailed it instantly.
- 🟨 **Amber:** I got it, but I had to think hard.
- 🟥 **Red:** My mind went blank. (Revisit these tomorrow).

4. The Interrogation (Homework Protocol)

True mastery requires testing under pressure. Hand 'The Vault' (answers) to your parent or guardian. They will test you on 20 random questions. They hold the score; they hold the signature.

5. The 3-Star Parent Effort Rubric

When authenticating your spaced retrieval practice on the final Mastery Tracker, your parent or guardian will evaluate your effort using the following criteria:

- ⭐ ⭐ ⭐ **3 Stars (Full Mastery):** Completed under strict exam conditions without glancing at notes or the Knowledge Vault. Total independent recall.
- ⭐ ⭐ **2 Stars (Consolidating):** Required 1–2 hints from the Knowledge Vault, but demonstrated sound foundational understanding.
- ⭐ **1 Star (Needs Intervention):** Rushed, mind went blank, or completed with notes open. Target facts must be hunted down and re-tested tomorrow.

How much progress did the Romans make in public health?

Q#	The Target Question	R	A	G	Notes / My Answer
1	Why was digging cesspits in the Iron Age a hygienic way to manage waste?	☐	☐	☐	
2	What technology did Roman engineers use to bring fresh water over miles into British towns?	☐	☐	☐	
3	Which Roman fort on Hadrian's Wall contains Britain's best-preserved communal latrine, with running water channels flushing waste into sewers?	☐	☐	☐	
4	What did Roman soldiers use to wipe themselves in communal latrines?	☐	☐	☐	
5	Which Emperor ordered the construction of a famous 73-mile defensive wall with fort bathhouses across northern Britain?	☐	☐	☐	
6	What was the primary purpose of Roman public aqueducts?	☐	☐	☐	
7	In a Roman town, where did wastewater from public baths and latrines drain?	☐	☐	☐	
8	What did wealthy Romans use to heat their private villas and bathhouses?	☐	☐	☐	
9	Why did the Romans build public bathhouses in almost every military fort and town?	☐	☐	☐	
10	What instrument did Romans use to clean their skin in the bathhouse instead of soap?	☐	☐	☐	
11	What happened to Roman water and sanitation infrastructure after the legions left Britain in 410 AD?	☐	☐	☐	
12	Why did Iron Age Britons have fewer sanitation crises before the Roman invasion?	☐	☐	☐	
13	What material was commonly used by Roman engineers to line water	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
	conduits and cisterns to make them watertight?				
14	What was the caldarium inside a Roman public bathhouse?	☐	☐	☐	
15	Who paid for the construction of most public bathhouses and fountains in Roman Britain?	☐	☐	☐	
16	What health hazard was unwittingly introduced by Roman plumbing in Britain?	☐	☐	☐	
17	What does AD stand for in historical dates?	☐	☐	☐	
18	What century is the year 1066 in?	☐	☐	☐	
19	Which ancient empire conquered Britain and built Hadrian's Wall?	☐	☐	☐	
20	What does the word 'Sanitation' mean?	☐	☐	☐

How much progress did the Romans make in public health?

Q#	The Target Question	R	A	G	Notes / My Answer
21	What is a primary source?	☐	☐	☐	
22	How did the departure of the Roman legions affect Britain's sanitation infrastructure?	☐	☐	☐	
23	Why did medieval towns grow increasingly filthy and unhygienic after 1100?	☐	☐	☐	
24	What was a "gong farmer" (or nightman) in medieval England?	☐	☐	☐	
25	What common method did medieval town dwellers use to dispose of waste from chamber pots?	☐	☐	☐	
26	Why were medieval monasteries typically healthier and more sanitary than ordinary towns?	☐	☐	☐	
27	What was the Latin term for a medieval communal toilet or latrine, often built over a river or cesspit?	☐	☐	☐	
28	What was the dominant medieval medical theory explaining how dirty air caused epidemic disease?	☐	☐	☐	
29	In what year did the devastating bubonic plague pandemic known as the Black Death arrive in England?	☐	☐	☐	
30	What did medieval town councils typically do in an attempt to combat the Black Death?	☐	☐	☐	
31	Why boundary and ditch laws in medieval towns like London often failed to keep streets clean?	☐	☐	☐	
32	What was the 1388 Parliament Act passed in Cambridge, often called England's first sanitary law?	☐	☐	☐	
33	Why did medieval public health laws often fail to keep towns clean?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
34	What was a conduit in medieval London, such as the Great Conduit built at Cheapside in 1245?	☐	☐	☐	
35	What animal was commonly blamed for wallowing in waste and roaming through medieval streets, leading to town bans?	☐	☐	☐	
36	Why were butchers and tanners considered the worst polluters in medieval towns?	☐	☐	☐	
37	What was the overarching attitude of medieval people towards disease and dirt?	☐	☐	☐	
38	How did the Romans transport massive amounts of fresh water?	☐	☐	☐	
39	What did the Romans use to flush their public toilets?	☐	☐	☐	
40	Why did the Roman army need to stay healthy?	☐	☐	☐

Why did public health decline during the Middle Ages?

Q#	The Target Question	R	A	G	Notes / My Answer
41	What did the Romans build in their forts to treat sick soldiers?	☐	☐	☐	
42	Did the Romans understand bacteria?	☐	☐	☐	
43	Approximately what was London's population around 1600 under Queen Elizabeth I?	☐	☐	☐	
44	What major hygiene crisis accompanied the rapid population growth of Early Modern London?	☐	☐	☐	
45	What new home technology was invented by Sir John Harington in 1596, though largely ignored for over a century?	☐	☐	☐	
46	Who was the eccentric courtier and godson of Queen Elizabeth I who published the first design for a flushing water closet?	☐	☐	☐	
47	What was the name of the satirical 1596 book in which Sir John Harington described his flushing toilet?	☐	☐	☐	
48	What was the New River project, completed in 1613 by Sir Hugh Myddelton?	☐	☐	☐	
49	Why did Sir Hugh Myddelton face financial ruin while building the New River?	☐	☐	☐	
50	How did Early Modern people explain the recurring outbreaks of plague, such as the Great Plague of 1665?	☐	☐	☐	
51	What did plague searchers and watchmen do during the Great Plague of 1665?	☐	☐	☐	
52	What did plague doctors wear as personal protective equipment during seventeenth-century outbreaks?	☐	☐	☐	
53	How did the Great Fire of London in 1666 inadvertently improve	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
	urban public health?				
54	Why did piped water in Early Modern London remain unavailable to most ordinary working families?	☐	☐	☐	
55	What was the main source of drinking water for poor Londoners in the seventeenth century?	☐	☐	☐	
56	What did scavengers (or rakers) do in Stuart London?	☐	☐	☐	
57	Why did the use of soap remain limited among ordinary people in the seventeenth century?	☐	☐	☐	
58	To what extent did Early Modern public health show genuine progress compared to the Middle Ages?	☐	☐	☐	
59	Why were medieval towns dangerous for public health?	☐	☐	☐	
60	What was a Gongfermer?	☐	☐	☐

To what extent did towns become filthier during the Early Modern period?

Q#	The Target Question	R	A	G	Notes / My Answer
61	Why did medieval monks build clean water systems?	☐	☐	☐	
62	What is a cesspit?	☐	☐	☐	
63	What did King Edward III order in 1357?	☐	☐	☐	
64	In what decade did the rapid industrial growth of British manufacturing towns begin to accelerate sharply?	☐	☐	☐	
65	What type of housing was rapidly constructed for factory workers in industrial cities like Manchester and Leeds?	☐	☐	☐	
66	Why were "back-to-back" houses notoriously unhealthy for industrial working families?	☐	☐	☐	
67	How many families typically had to share a single outdoor privy in crowded industrial courtyards?	☐	☐	☐	
68	In what year did cholera first strike Britain, arriving at the port of Sunderland from Europe?	☐	☐	☐	
69	What terrifying symptom gave cholera its chilling nickname, "The Blue Death"?	☐	☐	☐	
70	What was the dominant scientific theory among 1830s doctors regarding how cholera spread?	☐	☐	☐	
71	What was Edwin Chadwick's landmark 1842 report that exposed the appalling sanitary conditions of British towns?	☐	☐	☐	
72	What did Chadwick argue was the primary cause of urban poverty and high municipal poor relief rates?	☐	☐	☐	
73	What public health reform did Edwin Chadwick propose in his 1842 report?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
74	What was the main weakness of the landmark Public Health Act passed by Parliament in 1848?	☐	☐	☐	
75	Why did wealthy rate-payers and local town councils fiercely oppose the 1848 Public Health Act?	☐	☐	☐	
76	What was the political philosophy that argued the government should interfere as little as possible in business and daily life?	☐	☐	☐	
77	What was the average life expectancy for a factory worker in Manchester or Liverpool during the 1840s?	☐	☐	☐	
78	How did industrial water companies obtain and deliver water to poor working-class neighborhoods?	☐	☐	☐	
79	Why did the initial response to the 1831–32 cholera epidemic focus on prayer, fasting, and whitewashing streets with lime?	☐	☐	☐	
80	Why did rivers in early modern towns become open sewers?	☐	☐	☐

How did the Industrial Revolution lead to a public health crisis?

Q#	The Target Question	R	A	G	Notes / My Answer
81	Who invented a working flushing toilet in 1596?	☐	☐	☐	
82	Why did Harington's flushing toilet fail to catch on for 250 years?	☐	☐	☐	
83	What does 'urbanisation' mean?	☐	☐	☐	
84	How did early modern townspeople get their drinking water?	☐	☐	☐	
85	What environmental catastrophe struck London in the hot summer of June and July 1858?	☐	☐	☐	
86	What was the historical name given to the overwhelming stench from the River Thames in the summer of 1858?	☐	☐	☐	
87	What had turned the River Thames into a toxic, fermenting open sewer by the 1850s?	☐	☐	☐	
88	What extreme measures did Members of Parliament take in June 1858 to try to conduct debates in the House of Commons?	☐	☐	☐	
89	Who was the brilliant chief engineer of the Metropolitan Board of Works appointed to solve London’s sewage crisis?	☐	☐	☐	
90	What was the key principle of Joseph Bazalgette’s revolutionary sewer network design?	☐	☐	☐	
91	What durable building material did Bazalgette insist on using, testing every single batch to ensure it survived sewer acids?	☐	☐	☐	
92	What shape did Bazalgette choose for his underground sewer tunnels to prevent waste from settling and clogging?	☐	☐	☐	
93	How long was the total network of main intercepting and local street	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
	sewers constructed by Bazalgette across London?				
94	What major engineering feature did Bazalgette build along the north bank of the Thames, enclosing sewer pipes, an underground railway, and a modern road?	☐	☐	☐	
95	What are the three Thames Embankments constructed by Joseph Bazalgette in London?	☐	☐	☐	
96	Where did Bazalgette's northern and southern outfall sewers discharge London's untreated sewage into the Thames?	☐	☐	☐	
97	What happened during the last major cholera epidemic in London in 1866 that vindicated Bazalgette's sewer design?	☐	☐	☐	
98	Why was the 1866 cholera outbreak restricted to the East End of London?	☐	☐	☐	
99	What Victorian engineering landmarks were constructed by Bazalgette to pump sewage up to river discharge levels?	☐	☐	☐	
100	What political change in 1867 helped encourage Parliament to pass stronger public health laws like the 1875 Act?	☐	☐	☐

THE VAULT

Restricted Access: Answer Keys

How much progress did the Romans make in public health?

1. Roundhouse settlements were spread out and temporary pits kept waste away from springs
2. Stone channels called conduits that utilized the natural pull of gravity
3. Housesteads Fort on Hadrian's Wall
4. A wet sponge attached to the end of a shared wooden stick
5. Emperor Hadrian
6. To transport clean spring water continuously into towns using gravity
7. Into underground stone sewers like the Cloaca Maxima that discharged into local rivers
8. A hypocaust system circulating hot furnace air beneath raised floors
9. Because bathing, exercise, and socialising were central to Roman civic culture and soldier fitness
10. A metal scraper called a strigil used with olive oil
11. Town populations collapsed and stone aqueducts fell into decay and disrepair
12. Their dispersed, small population meant waste did not build up enough to contaminate water supplies
13. Waterproof hydraulic mortar (opus signinum)
14. The hot, steamy bathing room
15. Wealthy local magistrates and benefactors seeking political status
16. Lead poisoning from lead water pipes and cooking vessels
17. Anno Domini (the year of our Lord).
18. The 11th Century.
19. The Romans.
20. Conditions relating to public health, especially clean drinking water and sewage disposal.
21. Evidence that was created at the time of the event.
22. Stone conduits collapsed, public baths closed, and towns reverted to timber pits
23. Rapid population growth inside tight defensive walls overwhelmed inadequate cesspits and ditches
24. A laborer who emptied human excrement from privy cesspits under cover of darkness
25. Throwing waste directly out of upstairs windows into open gutters in the street
26. They were built near clean rivers, had running water conduits, and valued cleanliness as a religious duty
27. Garderobe or reredorter
28. Miasma Theory (poisonous foul air)
29. In the year 1348, arriving through southern ports
30. Ordered street cleaning, lit fragrant bonfires, and banned butchers from dumping blood in rivers

31. **Because butchers, tanners, and householders dumped animal guts, chemicals, and human waste directly into them**
32. **A law imposing heavy £20 fines for dumping filth and dung into rivers and ditches**

How much progress did the Romans make in public health?

33. Town councils lacked professional police forces to enforce regulations, and residents prioritized convenience
34. A large lead cistern bringing fresh spring water through underground pipes from Tyburn
35. Stray farm pigs
36. They produced rotting animal entrails, blood, and foul chemicals like urine used to soften leather
37. They viewed disease as divine punishment or miasma, and lacked bacteriological understanding of dirt
38. Aqueducts.
39. Running water from the aqueducts and bathhouses.
40. To march and fight efficiently across the Empire.

Why did public health decline during the Middle Ages?

41. Hospitals (Valetudinariums).
42. No, they just knew bad smells or swamps were linked to illness.
43. Around 200,000 citizens
44. Overcrowded timber tenements produced overwhelming refuse, overflowing cesspits into streets
45. A flushing water closet using a raised cistern and valve to wash a pan
46. Sir John Harington
47. The Metamorphosis of Ajax
48. A 38-mile engineered canal bringing fresh spring water from Hertfordshire into North London
49. Because construction costs soared and King James I had to step in and fund half the project
50. They attributed plague to divine wrath, astrological alignments, and poisonous airborne miasma
51. Searchers examined corpses to identify plague tokens; watchmen locked infected families inside houses
52. A waxed leather coat, wide hat, and a bird beak mask stuffed with sweet herbs
53. It destroyed dirty wooden slums, wiped out rat populations in warehouses, and led to wider brick streets
54. Private water companies charged high subscription fees, and pipes only delivered water for a few hours a week
55. Public street conduits, communal water carriers (cobs), and shallow wells contaminated by cesspits
56. They were paid parish officials who swept street dust, cleared dung heaps, and carted refuse to dunghills
57. Heavy excise taxes made soap an expensive luxury, and medical lore warned hot baths opened pores to plague
58. Projects like the New River provided cleaner water, but overcrowding and miasma theories persisted
59. They were overcrowded, with cesspits leaking into drinking wells.

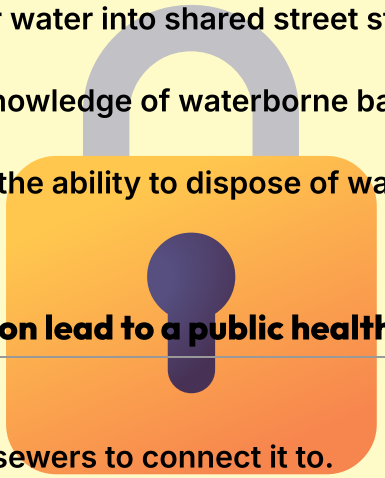

60. A medieval worker who cleared human waste from cesspits at night.

To what extent did towns become filthier during the Early Modern period?

61. They believed cleanliness brought them closer to God.
62. A pit for the disposal of liquid waste and sewage.
63. The removal of filth from London's streets to prevent sickness.
64. During the 1780s, driven by steam-powered cotton textile mills

To what extent did towns become filthier during the Early Modern period?

65. Back-to-back terraced houses built in narrow, unpaved courts
66. They had no through-ventilation, little daylight, and lacked private sanitation or drainage
67. Up to twenty or thirty families
68. In 1831, carried by Baltic sailors
69. Severe dehydration and oxygen loss turned the skin of dying patients blue and shrivelled
70. Miasma Theory (foul air from rotting waste)
71. The Report on the Sanitary Condition of the Labouring Population
72. Preventable disease caused by filthy living conditions and bad drainage
73. A national network of smooth ceramic sewer pipes flushed with clean water to carry waste away
74. It was non-compulsory; town councils were only required to act if death rates exceeded 23 per 1,000
75. Because setting up boards of health and building sewers required spending high local council tax rates
76. Laissez-faire
77. Around 17 to 19 years old
78. They pumped untreated river water into shared street standpipes that only flowed for an hour a day
79. Medical authorities had no knowledge of waterborne bacteria and blamed miasma and moral sin
80. Population growth outpaced the ability to dispose of waste.

How did the Industrial Revolution lead to a public health crisis?

81. John Harington.
82. There were no underground sewers to connect it to.
83. The increase in the proportion of people living in towns and cities.
84. Buying it from water sellers or sharing local pumps.
85. The Great Stink, when the sewage-filled Thames fermented in extreme summer heat
86. The Great Stink
87. The widespread installation of flush toilets that flushed human waste directly into old storm drains
88. They soaked window curtains in chloride of lime to neutralize the river stench
89. Joseph Bazalgette
90. To construct underground intercepting sewers running west to east, moving waste far downriver
91. Portland cement mortar
92. Egg-shaped (oval) cross-section tunnels
93. Around 82 miles of main intercepting sewers and over 1,100 miles of street sewers
94. The Victoria Embankment
95. Victoria Embankment, Albert Embankment, and Chelsea Embankment

96. **Far downstream past London at Beckton and Crossness, where the outgoing tide swept it to sea**

How did the Industrial Revolution lead to a public health crisis?

97. Cholera struck only the East End, where sewers were not yet finished, sparing connected areas
98. The East London Waterworks Company still supplied river water contaminated with sewage from the River Lea
99. The Abbey Mills and Crossness Pumping Stations, nicknamed "Cathedrals of Sewage"
100. The Second Reform Act, which gave the vote to urban working-class men

Why did it take the 'Great Stink' to finally clean up Britain's streets?

101. The government's belief that it shouldn't interfere in people's daily lives or public health.
102. Cholera.
103. Miasma Theory (bad smells).
104. By mapping the deaths around the Broad Street water pump.
105. Edwin Chadwick.
106. It was a waterborne disease transmitted by swallowing invisible contaminated water or food
107. A street map plotting each cholera death as a black bar outside houses near the pump
108. Remove the handle from the Broad Street water pump so residents could not drink the water
109. A cracked brick cesspool from house number 40 was leaking baby cholera waste into the well
110. They drank only malt liquor and drew water from a private deep well, not the street pump
111. Because prominent figures like Edwin Chadwick were deeply committed to Miasma Theory
112. Robert Koch
113. He showed customers drinking Lambeth water (intake moved upriver) had far lower death rates
114. The Early Middle Ages (500–1000 AD)
115. Laissez-faire attitudes, reluctance to pay high local taxes, and stubborn belief in miasma
116. Every local council was required to appoint a Medical Officer of Health and Sanitary Inspector
117. Romans aimed for civic hygiene without knowing germs; Victorians developed bacteriology and laws
118. He proved poor sanitation caused disease and poverty, driving the 1848 Public Health Act
119. It eliminated waterborne cholera from London and created drainage infrastructure used today
120. It pioneered epidemiology — using data collection, mapping, and deduction to track disease

End of Unit Assessment: Cholera Investigation

121. Because Roman engineering collapsed, urbanisation overwhelmed towns, and false theories delayed science
122. An aqueduct, using the pull of gravity.
123. A gongfermer (or nightman).
124. The Miasma Theory.
125. 1831 (in Sunderland).
126. The Great Stink of the River Thames.
