KEY TOPIC 3 • REVISION & PRACTICE COMPANION

Medicine in 18th & 19th Century Britain

c1700–c1900: Ideas on Causes, Prevention, Hospital Care, Surgery & Public Health

Primary Visual Evidence: James Gillray, *The Cow-Pock—or—the Wonderful Effects of the New Inoculation!* (1802 satirical cartoon satirising public fears of Edward Jenner's cowpox vaccine) HISTORICAL SATIRE ARCHIVE

PUPIL NAME: _____ TARGET: _____ CLASS: _____

KEY TOPIC 3 SPECIFICATION FRAMEWORK (1HI0/11)	LESSON DONE	QUIZ [10]
Key Topic 3.1: Ideas on Causes: Pasteur's Germ Theory & Koch's Bacteriology *How did swan-neck flasks (1861) and agar cultures (1876–83) demolish spontaneous generation?*	☐	☐
Key Topic 3.2: Approaches to Prevention: Edward Jenner & The Smallpox Vaccine *How did the 1796 cowpox experiment defeat variolation, and why did opposition persist until 1852?*	☐	☐
Key Topic 3.3: Improvements in Hospital Care: Florence Nightingale & Professional Nursing *How did Scutari (1854–56), Notes on Nursing (1859), and the pavilion plan transform Victorian mortality?*	☐	☐
Key Topic 3.4: The Surgical Revolution: Simpson's Chloroform & Lister's Antiseptics *How did Simpson conquer pain, Lister conquer infection, and the 1890s introduce aseptic surgery?*	☐	☐
Key Topic 3.5: Public Health & Cholera: John Snow & The 1875 Public Health Act *How did John Snow's Broad Street pump map (1854) and the 1875 Act permanently dismantle government laissez-faire?*	☐	☐

LIVING TIMELINE • PART 1: VACCINES, ANAESTHETICS & EARLY SANITATION (1700–1854)

Instructions: Complete the timeline sketches and notes as you master each enquiry lesson.

1796 • Edward Jenner: Smallpox Vaccination & Immunology

Key Topic 3.2

Jenner inoculates James Phipps with cowpox pus from Sarah Nelmes, proving cowpox confers immunity against smallpox. Publishes findings in 1798. Despite initial Royal Society scepticism, vaccination eradicates inoculator infection risks and founds immunology.

1847 • James Young Simpson: Chloroform & Anesthesia

Key Topic 3.4

Simpson discovers the potent anaesthetic properties of chloroform in Edinburgh, ending agony during surgery. Queen Victoria's use of chloroform during childbirth (1853) popularises it, enabling complex operations despite the initial 'Black Period' of surgery.

1848 • First Public Health Act & The General Board of Health

Key Topic 3.5

Spurred by Chadwick's 1842 report and epidemic cholera, Parliament passes the permissive 1848 Act. Towns can create local boards of health to supply clean water and drainage, though lack of compulsion leaves most cities vulnerable to filth and contagion.

1854 • John Snow: Broad Street Pump & Waterborne Cholera

Key Topic 3.5

During the Soho epidemic, Snow compiles his famous spot map linking 500+ fatal cholera cases to the Broad Street pump. Removing the handle immediately halts the outbreak, mathematically disproving the miasma theory seven years before Pasteur's Germ Theory.

The 18th century relied on empirical observation; the 19th century unlocked the laboratory.

LIVING TIMELINE • PART 2: GERM THEORY, ANTISEPTICS & COMPULSORY PUBLIC HEALTH (1854–1900)

Instructions: Complete the timeline sketches and notes as you master each enquiry lesson.

1854–56 • Florence Nightingale: Hospital Sanitation at Scutari

Key Topic 3.3

During the Crimean War, Nightingale enforces rigorous cleanliness, ventilation, and fresh nutrition at Scutari hospital, slashing soldier death rates from 40% to 2%. Returns to Britain to establish the Nightingale Training School and author Notes on Nursing (1859).

1861 • Louis Pasteur: Germ Theory & Swan-Neck Flask Experiments

Key Topic 3.1

Commissioned by Lille brewers, Pasteur disproves spontaneous generation using swan-neck flasks, demonstrating that airborne microbes cause fermentation and decay. In 1861, he publishes Germ Theory, proving microscopic germs cause specific diseases in living organisms.

1865–67 • Joseph Lister: Carbolic Acid Spray & Antiseptic Surgery

Key Topic 3.4

Applying Pasteur's Germ Theory to wound sepsis, Lister uses carbolic acid sprays, dressings, and hand-washing during surgery at Glasgow Infirmary. His antiseptic techniques reduce amputee mortality from 46% to 15%, paving the way for modern aseptic operating theatres.

1875 • The Second Public Health Act: End of Laissez-Faire

Key Topic 3.5

Disraeli's government ends laissez-faire by making public health compulsory. Municipal councils are legally required to provide clean piped water, subterranean sewer drainage, street lighting, and medical officers of health, transforming urban life expectancy.

Pasteur opened the door; Lister, Koch, and Bazalgette marched through it.

Why did it take 30 years for Germ Theory to transform medical understanding in Britain?

CHRONOLOGICAL INQUIRY SPINE • CORE CAUSAL NARRATIVE

Take precise, structured notes alongside each milestone as your teacher narrates the history

1 **c1700–1850s**

Spontaneous Generation & Miasma

- Smelling rotting meat and open cesspools
- Foul airborne damp blamed for illness
- Microscopes seeing tiny swimming creatures

FOCUS CLUE
Why did doctors believe disease created germs, rather than vice versa?

2 **1861**

Louis Pasteur & Germ Theory

- Heating sour beer inside glass flasks
- Bent swan necks trapping airborne dust
- Boiled broth staying clear and fresh

FOCUS CLUE
How did the swan-neck flask disprove spontaneous generation?

3 **1867–1876**

British Scepticism & John Tyndall

- London doctors defending bad air theory
- Shining light beams through dusty boxes
- Spraying smelly carbolic acid on cut flesh

FOCUS CLUE
Why did British doctors refuse to believe germs caused human illness?

4 **1876–1882**

Robert Koch & Specific Bacteria

- Solid seaweed agar jelly in shallow dishes
- Staining microbes with bright purple dyes
- Photographing deadly tuberculosis under glass lenses

FOCUS CLUE
How did Koch's staining and culture methods prove specificity?

5 **1883–1890**

Postulates & Microphotography

- Tracking curved cholera germs in river water
- Taking crisp black-and-white photos of germs
- Injecting farm animals to test poisons

FOCUS CLUE
Why was photomicrography crucial in winning British doctors over?

Pasteur proved that rotting soup doesn't spontaneously create germs; Koch proved which specific germs caused tuberculosis.

Question 4: Explain Why [12 marks • 15 mins]

EXTENDED WRITING ASSESSMENT

Explain why there was rapid progress in understanding the causes of disease in the period c1860–c1890. [12 marks]

Stimulus: Louis Pasteur's Germ Theory (1861) | Robert Koch's work on bacteria *(You must also use information of your own)*

ACCESSIBLE WRITING FRAMES:

One main reason was that... • For example, ... • This was important because... • Another key factor was... • In particular, ... • Overall, the most decisive reason was... because...

KEY VOCABULARY BANK:

swan-neck flask • Germ Theory (1861) • spontaneous generation • Robert Koch • agar jelly • methyl violet dye • tuberculosis (1882) • microphotography

Write your response in the space provided below:

(Response continues on facing page)

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 3.1). In the drawing box, sketch Pasteur's swan-neck flask experiment and Koch's agar plate. Annotate how identifying specific bacteria ended miasma theory forever! **[ ] Done**

Continue your response to Question 4 below:

Final analytical evaluation & concluding historical verdict:

• **QUESTION 3: EXPLAIN ONE DIFFERENCE [4 MARKS]** [4 MARKS • 5 MINS]

Explain one way in which ideas about the cause of disease in the late nineteenth century (c1860–c1890) were different from ideas in the Renaissance (c1500–c1700). [4 marks]

Why did Edward Jenner face fierce resistance despite discovering the smallpox vaccine?

CHRONOLOGICAL INQUIRY SPINE • CORE CAUSAL NARRATIVE

Take precise, structured notes alongside each milestone as your teacher narrates the history

1 **1721–1795**

Smallpox & Inoculation

- Scabbing sores blinding young children
- Scratching live pus into healthy arms
- Paying rich doctors high guinea fees

FOCUS CLUE

Why was inoculation dangerous for poor urban communities?

2 **1796–1798**

Edward Jenner & The Cowpox Vaccine

- Milking cows with clear smooth skin
- Scraping blister liquid into boy James Phipps
- Dosing boy with deadly pox without illness

FOCUS CLUE

How did Jenner use scientific experimentation to test folklore?

3 **1798–1810s**

Medical & Religious Opposition

- Printing scary cartoons with sprouting cow horns
- Church pulpits warning against beast blood
- Dirty hospital needles passing deadly infections

FOCUS CLUE

Why did London doctors and church leaders resist vaccination?

4 **1802–1840**

Parliamentary Funding & Adoption

- Voting thirty thousand pounds in gold coins
- Giving free scratches to village babies
- Banning old dangerous pus cuts by law

FOCUS CLUE

Why did the British government abandon laissez-faire for vaccination?

5 **1852–1871**

Compulsory Acts & Anti-Vaccine League

- Fining poor parents for refusing jabs
- Angry street protests marching with banners
- Plunging death rates as smallpox disappears

FOCUS CLUE

Why did making vaccination compulsory spark fierce public protests?

Cartoons showed vaccinated people growing cow heads and horns: proof that anti-vax memes existed long before social media.

Question 5/6: Evaluative Essay [16+4 marks • 20 mins]

EXTENDED WRITING ASSESSMENT

'Edward Jenner's development of the smallpox vaccine was the most significant breakthrough in the prevention of disease in the period c1700–c1900.' How far do you agree? [16+4 marks]

Stimulus: Inoculation | The Public Health Act (1875) *(You must also use information of your own)*

ACCESSIBLE WRITING FRAMES:

On the one hand, a major breakthrough was... • For example, ... • This was significant because... • On the other hand, an alternative factor was... • In particular, ... • Overall, the most decisive factor was... because...

KEY VOCABULARY BANK:

Edward Jenner (1796) • cowpox • James Phipps • smallpox • variolation • inoculation • compulsory vaccination (1852) • Anti-Vaccination League

Write your response in the space provided below:

(Response continues on facing page)

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 3.2). In the drawing box, sketch Jenner inoculating James Phipps with cowpox. Annotate how this empirical experiment laid the foundation for modern immunology! [ ] Done

Continue your response to Question 5/6 below:

Final analytical evaluation & concluding historical verdict:

• **QUESTION 3: EXPLAIN ONE DIFFERENCE [4 MARKS]** [4 MARKS • 5 MINS]

Explain one way in which methods of preventing smallpox in the late eighteenth century were different from methods used in the seventeenth century. [4 marks]

How did Florence Nightingale transform hospitals from death traps into places of cure?

CHRONOLOGICAL INQUIRY SPINE • CORE CAUSAL NARRATIVE

Take precise, structured notes alongside each milestone as your teacher narrates the history

1 **c1700–1850**

Voluntary Hospitals & Pre-Modern Nursing

- Crowded dark rooms smelling of festering wounds
- Drunk ward women sleeping on dirty rags
- Sharing blood-soaked blankets between beds

FOCUS CLUE
Why were early Victorian hospital wards notorious death traps?

2 **1854–1856**

Scutari & The Crimean War

- Sewers overflowing beneath wooden ward floors
- Scrubbing dirty walls with boiling water and soap
- Feeding wounded soldiers hot fresh stew

FOCUS CLUE
How did Nightingale's sanitary reforms drastically cut the death rate?

3 **1859**

Notes on Nursing & Sanitary Science

- Opening high windows for fresh river breezes
- Drawing colourful polar pie charts for MPs
- Demanding clean white cotton bandages

FOCUS CLUE
Why did Nightingale's belief in miasma still produce effective hygiene?

4 **1860s**

The Pavilion Plan Hospital Design

- Building long narrow brick ward pavilions
- Washing smooth glazed walls with water
- Cross-ventilation blowing stale room air away

FOCUS CLUE
How did the pavilion plan prevent cross-infection between wards?

5 **1860–1890s**

Professional Nurse Training & Asepsis

- Uniformed women learning medical rules at St Thomas'
- Stern matrons inspecting spotless bedside tables
- Fusing clean hands with microbe science

FOCUS CLUE
How did nurse training permanently raise the standard of hospital care?

Nightingale believed miasma caused disease, yet her obsession with fresh air, scrubbing, and clean drains saved thousands of lives.

Question 4: Explain Why [12 marks • 15 mins]

EXTENDED WRITING ASSESSMENT

Explain why the standard of hospital care and nursing improved so significantly in the second half of the nineteenth century. [12 marks]

Stimulus: Florence Nightingale's work in the Crimea (1854–56) | The pavilion hospital plan | *(You must also use information of your own)*

ACCESSIBLE WRITING FRAMES:

One main reason was that... • For example, ... • This was important because... • Another key factor was... • In particular, ... • Overall, the most decisive reason was... because...

KEY VOCABULARY BANK:

Florence Nightingale • Scutari (1854) • Notes on Nursing (1859) • pavilion plan • cross-ventilation • St Thomas' Hospital • trained nurses • sanitation

Write your response in the space provided below:

(Response continues on facing page)

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 3.3). In the drawing box, sketch the Pavilion Hospital plan with its separate, ventilated pavilions. Annotate how cross-ventilation prevented hospital gangrene! **[ ] Done**

Continue your response to Question 4 below:

Final analytical evaluation & concluding historical verdict:

• **QUESTION 3: EXPLAIN ONE DIFFERENCE [4 MARKS]** [4 MARKS • 5 MINS]

Explain one way in which hospital care in the late nineteenth century was different from hospital care in the Medieval period. [4 marks]

Why did the conquest of pain in surgery temporarily increase the patient death rate?

CHRONOLOGICAL INQUIRY SPINE • CORE CAUSAL NARRATIVE

Take precise, structured notes alongside each milestone as your teacher narrates the history

1 **c1700–1846**

Pre-Anaesthetic Surgery: Speed & Shock

- Holding down screaming patients with leather straps
- Sawing off broken legs in thirty seconds
- Breathing sweet laughing gas at fairgrounds

FOCUS CLUE
Why was surgical speed essential before the discovery of anaesthetics?

2 **1847–1853**

James Simpson & Chloroform

- Sniffing heavy liquid vapour under dinner table
- Young Hannah Greener dying from cold overdose
- Queen Victoria giving birth with zero pain

FOCUS CLUE
Why did the death of Hannah Greener cause panic among surgeons?

3 **1846–1865**

The "Black Period" of Surgery

- Wearing stiff dried blood coats as badges
- Cutting deeper into belly flesh for longer
- Black rotting gangrene killing feverish patients

FOCUS CLUE
Why did conquering surgical pain lead to higher patient death rates?

4 **1865–1870s**

Joseph Lister & Carbolic Acid Spray

- Treating green sewage water with smelly chemicals
- Wrapping boy Jamie Greenlees' fractured leg
- Pumping fine acid mist over open surgical wounds

FOCUS CLUE
How did Lister apply Germ Theory to solve hospital gangrene?

5 **1880s–1890s**

From Antiseptic to Aseptic Surgery

- Boiling metal scalpels in pressurized steam kettles
- Pulling on thin sterile rubber gloves
- Tying white cotton masks over mouths and noses

FOCUS CLUE
What is the crucial difference between antiseptic and aseptic surgery?

Chloroform conquered pain, but Lister conquered the invisible enemy: the rotting microbes thriving on surgeons' unwashed hands.

Question 4: Explain Why [12 marks • 15 mins]

EXTENDED WRITING ASSESSMENT

Explain why surgery became significantly safer in the period c1840–c1900. [12 marks]

Stimulus: James Simpson's discovery of chloroform (1847) | Joseph Lister's use of carbolic acid (1865) *(You must also use information of your own)*

ACCESSIBLE WRITING FRAMES:

One main reason was that... • For example, ... • This was important because... • Another key factor was... • In particular, ... • Overall, the most decisive reason was... because...

KEY VOCABULARY BANK:

James Simpson • chloroform (1847) • Black Period • Joseph Lister • carbolic acid spray (1865) • antiseptics • steam sterilisation • aseptic surgery

Write your response in the space provided below:

(Response continues on facing page)

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 3.4). In the drawing box, sketch Lister's carbolic donkey engine spraying mist over an open wound. Annotate the difference between antiseptic and aseptic surgery! **[ ] Done**

Continue your response to Question 4 below:

Final analytical evaluation & concluding historical verdict:

• **QUESTION 3: EXPLAIN ONE SIMILARITY [4 MARKS]** [4 MARKS • 5 MINS]

Explain one way in which surgical operations in the early nineteenth century (before 1846) were similar to surgery in the Medieval period. [4 marks]

Why did it take 20 years for John Snow's cholera discovery to change government policy?

CHRONOLOGICAL INQUIRY SPINE • CORE CAUSAL NARRATIVE

Take precise, structured notes alongside each milestone as your teacher narrates the history

1 **1831–1848**

Epidemic Terror & Edwin Chadwick

- Violent watery sickness turning human skin blue
- Piles of human excrement rotting near houses
- Parliament passing optional town health boards

FOCUS CLUE
Why did towns refuse to set up health boards under the 1848 Act?

2 **1854**

John Snow & The Broad Street Pump

- Plotting black death bars on street map
- Brewery men drinking ale staying completely healthy
- Unscrewing heavy iron pump handle with wrench

FOCUS CLUE
How did Snow use epidemiological mapping to prove water transmission?

3 **1854–1858**

Board of Health & Miasma Orthodoxy

- Cracked brick cesspool leaking into drinking well
- Medical journals laughing at dirty water theory
- Doctors burning pitch barrels in foggy streets

FOCUS CLUE
Why did the medical establishment refuse to accept Snow's water theory?

4 **1858–1865**

The Great Stink & Bazalgette's Sewers

- Boiling brown river mud halting Parliament debates
- Soaking courtroom window curtains in lime juice
- Digging thousand miles of underground brick tunnels

FOCUS CLUE
Why did fear of miasma paradoxically save thousands from cholera?

5 **1875**

The 1875 Public Health Act: End of Laissez-Faire

- Working factory men winning parliamentary votes
- Forcing town councils to pipe clean fresh water
- Hiring official medical inspectors for bad food

FOCUS CLUE
Why was the 1875 Act the definitive death blow to laissez-faire?

Snow removed the Broad Street pump handle in 1854, proving cholera was water-borne seven years before Germ Theory.

Question 5/6: Evaluative Essay [16+4 marks • 20 mins]

EXTENDED WRITING ASSESSMENT

'The work of John Snow was the main reason for improvements in public health in the nineteenth century.' How far do you agree? [16+4 marks]

Stimulus: Edwin Chadwick's 1842 Report | The Public Health Act (1875) *(You must also use information of your own)*

ACCESSIBLE WRITING FRAMES:

On the one hand, a major breakthrough was... • For example, ... • This was significant because... • On the other hand, an alternative factor was... • In particular, ... • Overall, the most decisive factor was... because...

KEY VOCABULARY BANK:

John Snow (1854) • Broad Street pump • waterborne cholera • Edwin Chadwick (1842) • Great Stink (1858) • Joseph Bazalgette • Public Health Act (1875) • laissez-faire

Write your response in the space provided below:

(Response continues on facing page)

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 3.5). In the drawing box, sketch John Snow's Broad Street pump map and Bazalgette's sewer network. Annotate how cholera forced Parliament to abandon laissez-faire! **[ ] Done**

Continue your response to Question 5/6 below:

Final analytical evaluation & concluding historical verdict:

• **QUESTION 3: EXPLAIN ONE DIFFERENCE [4 MARKS]** [4 MARKS • 5 MINS]

Explain one way in which government action on public health in the late nineteenth century was different from government action in the Renaissance. [4 marks]
