PUPIL NAME: _____ CLASS: _____ TEACHER: _____

KEY TOPIC 1 • C1250–C1500

Medicine in Medieval England

Supernatural Dogma, The Four Humours and The Black Death Catastrophe

Primary Visual Evidence: *Medieval Plague Sufferers in Bed with Buboes* • Toggenburg Bible MS (1411) **CONTEMPORARY PRINT ARCHIVE**

1. COMPARISON DRILLS [4M]
Q3: Explain one similarity or difference between eras. Specific factual detail + direct comparative reasoning (5 mins).

2. CAUSAL ANALYSIS [12M]
Q4: Explain why change or continuity occurred. 3 structured PEE paragraphs using 2 stimulus points + own knowledge (15 mins).

3. THEMATIC ESSAY [16M+4M]
Q5/Q6: 'How far do you agree?' Judgement essay balancing factors across broad time periods + SPaG criteria (25 mins).

COURSE SPECIFICATION • KEY ENQUIRY SEQUENCE	LEARNT	REVISED
Key Topic 1.1: Supernatural & Religious Explanations of Disease *Why did medieval people believe disease was sent by God, and how did the Catholic Church enforce medical dogma?*	☐	☐
Key Topic 1.2: Rational Explanations: Hippocrates, Galen & The Four Humours *How did the Four Humours and Theory of Opposites explain illness, and why were they never questioned?*	☐	☐
Key Topic 1.3: Approaches to Prevention & Treatment: Bleeding, Purging & Herbal Remedies *Why did humoural treatments such as bloodletting, purging, and Theriac remain the standard medical response?*	☐	☐
Key Topic 1.4: Medical Care Providers & Monastic Hospitals: 'Care Not Cure' *Who treated the sick in medieval England, and why did monastic hospitals focus purely on spiritual care?*	☐	☐
Key Topic 1.5: Case Study: Dealing with the Black Death Catastrophe (1348–1349) *Why were medieval people, physicians, and civic authorities completely unable to stop the Black Death?*	☐	☐

LIVING TIMELINE • PART 1: RELIGIOUS IDEAS & HUMOURAL FOUNDATIONS (C1250–C1320)

Instructions: As you study each enquiry lesson, complete the timeline missions by sketching and annotating in the corresponding Key Topic boxes below.

c. 1250 • The Church Monopoly: Galen & Monastic Scriptoria

Key Topic 1.1

Hippocrates' Four Humours and Galen's Opposites dominate medical thinking. Because Galen believed every organ was designed by a single Creator, the Church adopts his texts as sacred doctrine, controlling all manuscript copying in monastic scriptoria.

1277 • The Imprisonment of Roger Bacon (Suppression of Experimentation)

Key Topic 1.1

Franciscan friar Roger Bacon is imprisoned by Church leaders for advocating firsthand observation and scientific experiments rather than unquestioned acceptance of ancient books. This harsh punishment warns scholars that challenging Galen is heresy.

c. 1300 • The Physician's Toolkit: Uroscopy in the Matula & Zodiac Man

Key Topic 1.2

Physicians carry pocket Vademecum handbooks containing 20-shade urine charts and astrology wheels. Examining urine in a glass matula becomes the primary diagnostic method; doctors check the Zodiac Man to determine when to perform bloodletting.

c. 1320 • Humoural Therapeutics: Phlebotomy, Purging & Theriac

Key Topic 1.3

Treatments focus entirely on restoring humoural balance. Phlebotomy (bloodletting with fleams, cupping, or leeches) and purging (emetics and clysters) physically deplete patients. Apothecaries prepare Theriac (60+ ingredients including viper flesh) as a universal remedy.

LIVING TIMELINE • PART 2: MONASTIC CARE & THE BLACK DEATH CATASTROPHE (1345–C1500)

Instructions: As you study each enquiry lesson, complete the timeline missions by sketching and annotating in the corresponding Key Topic boxes below.

c. 1350–1400 • Monastic Hospitals: The Era of 'Care Not Cure'

Key Topic 1.4

Over 1,200 hospitals run by monks and nuns operate in England (e.g. St Bartholomew's, 1123). Patients receive clean bedding, warmth, food, and continuous prayer facing a chapel altar. Zero surgery or medical cure is attempted; lepers and plague victims are strictly barred.

1345 • The Great Planetary Conjunction in Aquarius

Key Topic 1.5

In March 1345, Mars, Jupiter, and Saturn align in Aquarius. University of Paris physicians state this celestial conjunction drew up poisonous vapours from the earth, corrupting the air with deadly miasma, preparing Europe for the Black Death.

1348 • The Black Death Reaches Melcombe Regis, Dorset

Key Topic 1.5

In June 1348, the pestilence arrives on trade ships carrying black rats and fleas. The dual epidemic—bubonic plague (flea bites, agonizing buboes) and pneumonic plague (airborne coughing droplets)—kills 30–50% of England's population within 18 months.

1349 • King Edward III's Cleanliness Order & East Smithfield Mass Pits

Key Topic 1.5

Alarmed by rotting waste and stench, Edward III orders London streets cleared of dung to remove miasma. Churchyards overflow; emergency mass burial trenches are dug outside city walls at East Smithfield to bury hundreds of corpses daily.

KT1.1: Supernatural & Religious Explanations of Disease

KNOWLEDGE RETRIEVAL • KEY VOCABULARY • EXAM PRACTICE

• 'DO NOW' RETRIEVAL DRILL (10 RECALL QUESTIONS)

Score: [/ 10]

1. Which ancient Greek physician is known as the 'Father of Medicine'?

2. In which century BC did Hippocrates live and teach?

3. Name the four bodily humours identified by Hippocrates.

4. What term describes Hippocrates' method of observing symptoms at the bedside?

5. Which ancient Roman physician expanded this into the Theory of Opposites?

6. In which century AD did Galen live and practise in Rome?

7. Why did Galen dissect pigs and apes instead of human corpses?

8. What Latin term refers to foul-smelling air believed to cause epidemic disease?

9. What was the ethical pledge written by Hippocrates taken by doctors?

10. What term describes explaining natural events through God or spirits?

• KEY VOCABULARY TASK

TERMINOLOGY

Define **Divine Retribution** and explain how it differed from a **Planetary Conjunction** as an explanation of disease:

• QUESTION 3(A): EXPLAIN ONE SIMILARITY [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which ideas about the cause of disease in the Medieval period (c1250–c1500) were similar to ideas in the Renaissance period (c1500–c1700). [4 marks]

Target: AO1/AO2 [4 marks] • Identify 1 valid similarity (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were similarity was that... • In the earlier period... • In the same way, in the later period...*

• QUESTION 3(B): EXPLAIN ONE DIFFERENCE [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which ideas about the cause of disease in the Medieval period (c1250–c1500) were different from ideas in the Modern period (c1900–present). [4 marks]

Target: AO1/AO2 [4 marks] • Identify 1 valid difference (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were difference was that... • In the earlier period... • In contrast, in the later period...*

Question 4: Explain Why [12 marks • 15 mins]

Explain why the Catholic Church had such a major influence on ideas about the causes of disease in the period c1250–c1500. [12 marks]

Stimulus: Monastic scriptoria and book-copying | The imprisonment of Roger Bacon (1277) *(You must also use information of your own)*

STRUCTURE STRIP • 3-PARAGRAPH ANALYTICAL PLAN

1. MONOPOLY ON LEARNING	2. DIVINE RETRIBUTION	3. LACK OF ALTERNATIVES
Explain how monks controlled manuscript copying in scriptoria; universities taught theology and Galen; questioning Church teaching was punished as heresy (Roger Bacon 1277).	Explain how the Church taught disease was sent directly by God to punish sin, test faith, or cleanse moral corruption (e.g. biblical leprosy and Lazar houses).	Explain how the Church accepted Christian astrology (1345 planetary alignment); without printing or dissection, ordinary people had zero alternative explanations.

ANALYTICAL CONNECTIVES:
One main reason was that... • For example, ... • This was important because... • Another key factor was... • In particular, ... • Overall, the most decisive reason was... because...

KEY VOCABULARY BANK:
divine retribution • biblical leprosy • Lazar houses • teleology • heresy • Roger Bacon (1277) • monastic scriptoria • 1345 planetary conjunction • astrological almanacs

Task: *Using the structure strip above, write your analytical response below (continue on Pages 6–7 for full 3-paragraph timed assessment):*

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 1.1). In the drawing box, sketch a monk copying Galen's medical book in a scriptorium. Add two speech bubbles explaining why the Church banned new medical experiments and imprisoned Roger Bacon in 1277.

← Pages 2–3

Galen wrote it, monks copied it, nobody dared question it. Because questioning Galen wasn't just bad science—it was a heresy trial.

MARGIN	*[Extended Response • Paragraph 2 / Further Disciplinary Notes]*

Questioning Galen or Church doctrine in 1300 was not just bad science — it was an immediate charge of heresy.

MARGIN	*[Extended Response Continued • Paragraph 3 & Sustained Conclusion]*

KT1.2: Rational Explanations: Hippocrates, Galen & The Four Humours

KNOWLEDGE RETRIEVAL • KEY VOCABULARY • EXAM PRACTICE

• 'DO NOW' RETRIEVAL DRILL (10 RECALL QUESTIONS)

Score: [/ 10]

1. Why did the medieval Catholic Church support Galen's medical writings?

2. Name the Franciscan friar imprisoned in 1277 for advocating scientific experimentation.

3. Where were all medical books hand-copied during the Middle Ages?

4. What was considered the primary supernatural cause of disease in medieval Europe?

5. What special hospitals were built outside town walls to isolate lepers?

6. What astrological event in 1345 was blamed for corrupting the atmosphere?

7. Which Greek doctor originated the Theory of the Four Humours?

8. Which Roman doctor wrote treatises that became unquestioned Church dogma?

9. What Latin term was used for religious beliefs that contradicted Church doctrine?

10. Name the English pilgrimage destination famous for the shrine of Thomas Becket.

• KEY VOCABULARY TASK

TERMINOLOGY

Define **Humoural Imbalance** and explain how it differed from **Miasmatic Corruption**:

• QUESTION 3(A): EXPLAIN ONE SIMILARITY [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which rational ideas about the cause of disease in the Medieval period were similar to ideas in the Renaissance period. |4 marks|

Target: AO1/AO2 [4 marks] • Identify 1 valid similarity (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were similarity was that... • In the earlier period... • In the same way, in the later period...*

• QUESTION 3(B): EXPLAIN ONE DIFFERENCE [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which methods of diagnosing illness in the Medieval period were different from methods of diagnosis in the Modern period. |4 marks|

Target: AO1/AO2 [4 marks] • Identify 1 valid difference (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were difference was that... • In the earlier period... • In contrast, in the later period...*

Question 4: Explain Why [12 marks • 15 mins]

EXTENDED WRITING ASSESSMENT

Explain why the Theory of the Four Humours remained the dominant rational explanation of disease throughout the period c1250–c1500. [12 marks]

Stimulus: Galen's Theory of Opposites | The diagnostic matula (uroscopy) *(You must also use information of your own)*

STRUCTURE STRIP • 3-PARAGRAPH ANALYTICAL PLAN

1. LOGIC OF THE FOUR HUMOURS	2. ACTIONABLE TREATMENT RULES	3. UNIVERSAL DIAGNOSTIC TOOLS
Explain how Hippocrates' balance of blood, phlegm, yellow bile, and black bile linked fluids to seasons and elements, providing a universal, sensible framework.	Explain how Galen's Theory of Opposites gave practical rules (curing excess cold/moist phlegm with hot/dry remedies), making the theory actionable for doctors.	Explain how uroscopy (examining urine in a matula against a 20-shade wheel) and the Zodiac Man gave doctors diagnostic authority without physical examination.

ANALYTICAL CONNECTIVES:
One main reason was that... • For example, ... • This was important because... • Another key factor was... • In particular, ... • Overall, the most decisive reason was... because...

KEY VOCABULARY BANK:
Four Humours • Theory of Opposites • blood (sanguine) • phlegm (phlegmatic) • yellow bile (choleric) • black bile (melancholic) • uroscopy • matula flask • Vademecum • Zodiac Man

Task: *Using the structure strip above, write your analytical response below (continue on Pages 10–11 for full 3-paragraph timed assessment):*

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 1.2). In the drawing box, sketch a physician holding a urine flask (matula) up to the light. Label two reasons why physicians checked star charts (the Zodiac Man) before treating a patient.

← **Pages 2–3**

MARGIN	*[Extended Response • Paragraph 2 / Further Disciplinary Notes]*

The Four Humours endured for 1,400 years because it was rational, comprehensive, and explained every known symptom.

MARGIN	*[Extended Response Continued • Paragraph 3 & Sustained Conclusion]*

KT1.3: Approaches to Treatment: Bleeding, Purging & Herbal Remedies

KNOWLEDGE RETRIEVAL • KEY VOCABULARY • EXAM PRACTICE

• 'DO NOW' RETRIEVAL DRILL (10 RECALL QUESTIONS)

Score: [/ 10]

1. Which bodily humour was associated with spring, air, and a warm, moist temperament?

2. Which bodily humour was associated with winter, water, and a cold, moist temperament?

3. According to Galen's Theory of Opposites, how should a cold, moist fever be treated?

4. What glass flask did medieval physicians hold up to the light to examine urine?

5. What chart matched urine colour, sediment, and clarity against 20 shades?

6. What pocket handbook containing medical and astrological charts did physicians carry?

7. What diagram showed which star signs governed different parts of the human body?

8. Why did physicians check the moon's position before performing surgery or bleeding?

9. Who controlled all medical learning and universities in medieval England?

10. What Latin medical curriculum was read by university students without patient contact?

• KEY VOCABULARY TASK

TERMINOLOGY

Define **Phlebotomy (Bloodletting)** and explain how it differed from **Purging (Emetics & Clysters)**:

• QUESTION 3(A): EXPLAIN ONE SIMILARITY [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which approaches to medical treatment in the Medieval period were similar to approaches to treatment in the Renaissance period. [4 marks]

Target: AO1/AO2 [4 marks] • Identify 1 valid similarity (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were similarity was that... • In the earlier period... • In the same way, in the later period...*

• QUESTION 3(B): EXPLAIN ONE DIFFERENCE [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which medical treatments in the Medieval period were different from treatments in the Renaissance period. [4 marks]

Target: AO1/AO2 [4 marks] • Identify 1 valid difference (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were difference was that... • In the earlier period... • In contrast, in the later period...*

Whatever is wrong with you, draining two pints of blood with thirty hungry leeches will at least distract you from your runny nose.

Question 4: Explain Why [12 marks • 15 mins]

EXTENDED WRITING ASSESSMENT

Explain why humoural treatments such as bloodletting and purging remained the standard medical response to illness throughout the Middle Ages (c1250–c1500). [12 marks]

Stimulus: Phlebotomy (bloodletting) | The Regimen Sanitatis *(You must also use information of your own)*

STRUCTURE STRIP • 3-PARAGRAPH ANALYTICAL PLAN

1. HUMOURAL DRAINING	2. PURGING THE DIGESTIVE TRACT	3. HERBAL THERIACS & REGIMEN
Explain how doctors believed excess blood caused fevers and inflammation; describe methods (fleams into veins, cupping, live leeches) and why patients felt psychosomatic relief.	Explain how emetics (inducing vomiting) and laxatives/enemas (clysters) were used to violently clear corrupted humours from the stomach and intestines.	Explain how apothecaries compounded antidotes like Theriac (60+ ingredients) and how physicians advised rich patients to follow the Regimen Sanitatis (diet, exercise, rest).

ANALYTICAL CONNECTIVES:
One main reason was that... • For example, ... • This was important because... • Another key factor was... • In particular, ... • Overall, the most decisive reason was... because...

KEY VOCABULARY BANK:
phlebotomy (bloodletting) • fleam • scarification • cupping • leeches (Hirudo medicinalis) • purging • emetics • clyster (enema) • Theriac • Regimen Sanitatis • pilgrimages • relics

Task: *Using the structure strip above, write your analytical response below (continue on Pages 14–15 for full 3-paragraph timed assessment):*

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 1.3). In the drawing box, draw a barber-surgeon's bleeding bowl, fleam, and leeches. Write a 2-sentence explanation of how bloodletting was believed to restore humoural balance. ← Pages 2–3

Medieval Theriac contained 64 ingredients, including mashed vipers and raw opium. If it didn't cure your fever, at least you stopped caring.

MARGIN	*[Extended Response • Paragraph 2 / Further Disciplinary Notes]*

MARGIN	*[Extended Response Continued • Paragraph 3 & Sustained Conclusion]*

KT1.4: Medical Care Providers & Monastic Hospitals: 'Care Not Cure'

KNOWLEDGE RETRIEVAL • KEY VOCABULARY • EXAM PRACTICE

• 'DO NOW' RETRIEVAL DRILL (10 RECALL QUESTIONS)

Score: [/ 10]

1. Name three methods used by medieval practitioners to draw blood during phlebotomy.

2. What ancient herbal compound contained over 60 ingredients including viper flesh?

3. What Latin lifestyle guide advised medieval elites on diet, sleep, and bathing?

4. What pointed surgical instrument was used by barber-surgeons to cut into a vein?

5. What was the function of an emetic in medieval medicine?

6. What long syringe was used by medieval practitioners to administer herbal enemas?

7. Name two religious treatments medieval people used to seek healing.

8. What is the difference between humoural imbalance and miasma?

9. Which ancient Greek doctor developed clinical observation and the Four Humours?

10. Which ancient Roman physician originated the Theory of Opposites?

• KEY VOCABULARY TASK

TERMINOLOGY

Define **Monastic Hospital 'Care'** and explain how it differed from Modern Hospital **Medical 'Cure'**:

• QUESTION 3(A): EXPLAIN ONE SIMILARITY [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which the types of medical practitioners available to ordinary people in the Medieval period were similar to those in the Renaissance period. [4 marks]

Target: AO1/AO2 [4 marks] • Identify 1 valid similarity (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were similarity was that... • In the earlier period... • In the same way, in the later period...*

• QUESTION 3(B): EXPLAIN ONE DIFFERENCE [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which hospital care in the Medieval period was different from hospital care in the 18th or 19th century. [4 marks]

Target: AO1/AO2 [4 marks] • Identify 1 valid difference (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were difference was that... • In the earlier period... • In contrast, in the later period...*

Can't afford 10 gold groats for an Oxford-trained physician? The local wise woman has some mashed cabbage, nettles, and a lucky Latin rhyme.

Question 4: Explain Why [12 marks • 15 mins]

Explain why medieval hospitals focused on providing 'care not cure' in the period c1250–c1500. [12 marks]

Stimulus: The role of monks and nuns | The exclusion of infectious patients *(You must also use information of your own)*

STRUCTURE STRIP • 3-PARAGRAPH ANALYTICAL PLAN

1. RELIGIOUS FOUNDATIONS
Explain how over 1,200 hospitals were monastic charities; their purpose was hospitium (hospitality, warmth, food, clean sheets, and prayer facing a chapel altar).

2. ABSENCE OF PHYSICIANS
Explain how hospitals were staffed by monks and nuns rather than university physicians; doctors were expensive, surgery was prohibited to clergy, and no cures existed.

3. PATIENT EXCLUSION
Explain why hospitals strictly turned away lepers, plague victims, and terminal cases to preserve spiritual peace, redirecting lepers to separate Lazar houses.

ANALYTICAL CONNECTIVES:
One main reason was that... • For example, ... • This was important because... • Another key factor was... • In particular, ... • Overall, the most decisive reason was... because...

KEY VOCABULARY BANK:
'care not cure' • hospitium • St Bartholomew's (1123) • Augustinian nuns • chapel altar • university physician • barber-surgeon • apothecary • wise woman • Guild of Surgeons (1368) • Lazar houses

Task: *Using the structure strip above, write your analytical response below (continue on Pages 18–19 for full 3-paragraph timed assessment):*

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 1.4). In the drawing box, sketch medieval hospital beds facing a chapel altar. Write two bullet points explaining why monastic hospitals focused on spiritual 'care, not cure'. ← Pages 2–3

MARGIN	*[Extended Response • Paragraph 2 / Further Disciplinary Notes]*

MARGIN	*[Extended Response Continued • Paragraph 3 & Sustained Conclusion]*

KT1.5: Case Study: Dealing with the Black Death (1348–1349)

KNOWLEDGE RETRIEVAL • KEY VOCABULARY • EXAM PRACTICE

• 'DO NOW' RETRIEVAL DRILL (10 RECALL QUESTIONS)

Score: [/ 10]

1. State the motto or philosophy of medieval monastic hospitals regarding patient treatment.

2. Name two groups of patients strictly excluded from medieval monastic hospitals.

3. Which religious figures actually staffed and operated medieval hospitals?

4. Which medical practitioners performed bloodletting, tooth-pulling, and minor surgery?

5. Why were university-trained physicians inaccessible to ordinary peasants?

6. Where did ordinary villagers turn for herbal salves, charms, and childbirth help?

7. Which medical guild was formally established in London in 1368?

8. In what year was London's famous St Bartholomew's Hospital founded?

9. Why were hospital beds arranged to face directly toward the chapel altar?

10. In what Dorset port did the Black Death first arrive in England in June 1348?

• KEY VOCABULARY TASK

TERMINOLOGY

Define **Bubonic Plague** and explain how it differed from **Pneumonic Plague** in transmission and mortality:

• QUESTION 3(A): EXPLAIN ONE SIMILARITY [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which attempts to prevent the spread of the Black Death (1348) were similar to attempts to prevent the Great Plague of London (1665). [4 marks]

Target: AO1/AO2 [4 marks] • Identify 1 valid similarity (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were similarity was that... • In the earlier period... • In the same way, in the later period...*

• QUESTION 3(B): EXPLAIN ONE DIFFERENCE [4 MARKS]

[4 MARKS • 5 MINS]

Explain one way in which civic reactions to the Black Death (1348) were different from civic reactions to the Great Plague (1665). [4 marks]

Target: AO1/AO2 [4 marks] • Identify 1 valid difference (1m) • Detail both named eras (3m).

Sentence Stems: *One way in which they were difference was that... • In the earlier period... • In contrast, in the later period...*

Carrying a posy of dried lavender and sniffing vinegar won't stop flea bites, but at least London streets smelled slightly more tolerable.

Question 5/6: Evaluative Essay [16+4 marks • 25 mins]

'The main reason why people failed to prevent the spread of the Black Death in 1348–49 was belief in supernatural causes.' How far do you agree? Explain your answer. [16+4 marks]

Stimulus: Punishment from God | Miasma (bad air) *(You must also use information of your own)*

STRUCTURE STRIP • 3-PARAGRAPH ANALYTICAL PLAN

1. SUPERNATURAL CAUSES (AGREE)	2. MIASMA & FLEAS (DISAGREE)	3. CIVIC WEAKNESS (EVALUATION)
Explain how people believed God sent the plague to punish sin, prompting mass church gatherings, pilgrimages, and flagellants whipping themselves —accelerating contagion.	Explain how belief in bad air led to futile measures (street fires, carrying sweet posies), while cramped timber housing allowed black rats and fleas to multiply unchecked.	Weigh the factors: neither physicians nor civic officials understood bacteria; Edward III's 1349 street-cleaning order was powerless against rat fleas and coughing droplets.

ANALYTICAL CONNECTIVES:
One main argument is that... • For example, ... • This was significant because... • On the other hand, another factor was... • In particular, ... • In conclusion, the most decisive reason was... because...

KEY VOCABULARY BANK:
The Black Death (1348–49) • Melcombe Regis • Yersinia pestis • bubonic plague (rat fleas) • pneumonic plague (cough droplets) • buboes • 30–50% mortality • flagellants • sweet posies • street fires • Edward III (1349) • East Smithfield plague pits

Task: *Using the structure strip above, write your analytical response below (continue on Pages 22–23 for full 3-paragraph timed assessment):*

TIMELINE MISSION Turn to Pages 2–3 (Key Topic 1.5). In the drawing boxes, sketch the spread of the Black Death (rat fleas and airborne coughs) and Londoners cleaning streets. Explain why clearing dung could not stop the plague.

← **Pages 2–3**

MARGIN	*[Extended Response • Paragraph 2 / Further Disciplinary Notes]*

MARGIN	*[Extended Response Continued • Paragraph 3 & Sustained Conclusion]*
