

THE PAPER 1: MEDICINE THROUGH TIME WITH THE WESTERN FRONT DOSSIER: MEDIEVAL

97 Crucial Questions. Complete Knowledge Mastery.

Operative / Student Name: _____

Target: Total Recall

RESTRICTED ACCESS - MASTER YOUR MEMORY

How to Hack Your Memory

(Rules of Engagement)

1. Never Just Read

Reading the answers feels like learning, but it's an illusion. You must force your brain to struggle to find the answer. The struggle is what builds memory pathways.

2. Cover, Recall, Check

Cover the answer sheet. Write your answer down in the notes section (or say it out loud). Only then are you allowed to check 'The Vault'.

3. Track Your Threat Level

Use the R-A-G (Red, Amber, Green) checkboxes next to every question after you attempt it.

- ☐ **Green:** I nailed it instantly.
- ☐ **Amber:** I got it, but I had to think hard.
- ☐ **Red:** My mind went blank. (Revisit these tomorrow).

4. The Interrogation (Homework Protocol)

True mastery requires testing under pressure. Hand 'The Vault' (answers) to your parent or guardian. They will test you on 20 random questions. They hold the score; they hold the signature.

KT1.1: What did Medieval people believe caused illness?

Q#	The Target Question	R	A	G	Notes / My Answer
1	Who was the Ancient Greek physician credited with creating the Theory of the Four Humours?	☐	☐	☐	
2	In the Theory of the Four Humours, which humour was associated with the season of Autumn, the element of Earth, and the qualities of cold and dry?	☐	☐	☐	
3	Which humour was linked to the temperament 'sanguine' and had the qualities of being hot and wet?	☐	☐	☐	
4	How did the 2nd-century Roman physician Galen develop Hippocrates' original ideas on the humours?	☐	☐	☐	
5	Why did the medieval Christian Church so strongly support and promote Galen's medical ideas?	☐	☐	☐	
6	What was the name of the mid-13th-century medical textbook collection used by students in European universities?	☐	☐	☐	
7	According to the medieval Church's teachings, why did God send diseases like leprosy to humans?	☐	☐	☐	
8	During the medieval period, what did physicians use to determine the best time for treatment based on the positions of the planets?	☐	☐	☐	
9	In medieval England, an unusual planetary alignment of Mars, Jupiter, and Saturn in the year 1345 was widely blamed for causing which disaster?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
10	Which theory suggested that breathing in 'bad air' filled with harmful fumes from swamps, corpses, or rotting matter corrupted the humours?	☐	☐	☐	
11	Why did the Church strictly discourage and prevent medical students and physicians from performing human dissections?	☐	☐	☐	
12	In the Theory of the Four Humours, which element and qualities were associated with Phlegm?	☐	☐	☐	
13	What was the primary purpose of a medieval physician examining a patient's urine?	☐	☐	☐	
14	Which three characteristics of a urine sample did medieval physicians check on a urine chart wheel?	☐	☐	☐	
15	Which ancient Greek philosopher's work on logic and observation was studied by medieval medical students alongside the works of Galen?	☐	☐	☐	
16	In the context of the Theory of Opposites, how would a medieval physician treat a patient who had a cold, wet fever (excess phlegm)?	☐	☐	☐	
17	How did the Church's total control over education and book production affect medical progress in the Middle Ages?	☐	☐	☐	
18	What was the 'Vademecum' carried by medieval physicians?	☐	☐	☐	
19	In the Theory of the Four Humours, the liver was associated with which humour?	☐	☐	☐	
20	How was leprosy viewed by the medieval Church and population?	☐	☐	☐

KT1.1: What did Medieval people believe caused illness?

Q#	The Target Question	R	A	G	Notes / My Answer
21	What does the term 'public health' refer to?	☐	☐	☐	
22	Name one ancient civilization that influenced later medical ideas.	☐	☐	☐	
23	Why was the Catholic Church so powerful in the Middle Ages?	☐	☐	☐	
24	Explain how religion might both help and hinder medical progress.	☐	☐	☐	
25	To what extent were ancient ideas like those of Hippocrates still influential in c1250?	☐	☐	☐	
26	What was the most common medical method used to balance an excess of the blood humour in medieval England?	☐	☐	☐	
27	Which of the following was a standard method of bloodletting where a vein was opened, usually in the arm, using a sharp tool called a fleam?	☐	☐	☐	
28	In what medical scenario would a medieval physician choose leeching (using leeches) over venesection?	☐	☐	☐	
29	During the cupping method of bloodletting, what was the purpose of heating the glass or metal cup before placing it on the patient's skin?	☐	☐	☐	
30	What was the medical purpose of 'purging' a patient in medieval medicine?	☐	☐	☐	
31	What was a 'clyster' in medieval medicine?	☐	☐	☐	
32	What was the 'Regimen Sanitatis'?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
33	Which of the following was a highly popular, complex medieval remedy containing up to 70 herbs, spices, and ingredients like opium and snake flesh, used as a universal antidote?	☐	☐	☐	
34	How did medieval people attempt to prevent miasma from entering their bodies or homes?	☐	☐	☐	
35	Why did medieval physicians often recommend bathing in warm water as a treatment?	☐	☐	☐	
36	If a patient was suffering from a hot and dry illness, such as a fever, how would a physician apply the Theory of Opposites to treat them?	☐	☐	☐	
37	What religious act was commonly undertaken by sick medieval people to show repentance for their sins and beg God for a miraculous physical cure?	☐	☐	☐	
38	What did the medieval Church teach was the spiritual value of enduring physical pain and illness?	☐	☐	☐	
39	Which herbal preparation involved crushing medicinal plants and applying them directly to the skin to draw out poisons or ease pain?	☐	☐	☐	
40	Why did public baths ('stewes') in England begin to close down toward the end of the medieval period?	☐	☐	☐

KT1.2: How did Medieval people try to prevent and treat disease?

Q#	The Target Question	R	A	G	Notes / My Answer
41	In the context of humoral medicine, why did physicians pay close attention to what patients ate and drank?	☐	☐	☐	
42	What was the primary method of purging a patient if the physician believed the excess humour was located in the upper stomach?	☐	☐	☐	
43	What spiritual practice did extreme religious groups perform publicly during crises to appease God's anger and prevent disease?	☐	☐	☐	
44	Which of these was a common laxative plant used in medieval England to purge the bowels?	☐	☐	☐	
45	What was the purpose of keeping a piece of amber or gold near a patient suffering from certain illnesses?	☐	☐	☐	
46	Which medical practitioner in medieval England attended university for up to ten years, was licensed to diagnose illness, but rarely carried out physical treatment himself?	☐	☐	☐	
47	Which group of medieval medical practitioners mixed herbal remedies, sold spices, and were often viewed as a cheaper alternative to expensive physicians?	☐	☐	☐	
48	What training route did medieval barber-surgeons take to learn their craft, such as performing amputations or pulling teeth?	☐	☐	☐	
49	Why did the medieval Catholic Church strictly ban monks and priests from performing	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
	surgeries that involved shedding blood?				
50	In a typical medieval hospital run by the Church, what was the primary focus of the monastic staff?	☐	☐	☐	
51	Which of the following groups of patients would be systematically turned away and rejected from entering a medieval charity hospital?	☐	☐	☐	
52	Why did many medieval hospitals have their chapel positioned at the very center of the ward, visible from all patient beds?	☐	☐	☐	
53	In medieval England, who was responsible for providing the vast majority of daily medical care and herbal treatments to the sick?	☐	☐	☐	
54	Which of the following was a manual surgical task that a medieval barber-surgeon would regularly perform?	☐	☐	☐	
55	Why were university-trained physicians so rarely employed or seen in medieval England?	☐	☐	☐	
56	What was the main diagnostic tool a medieval physician used at a patient's bedside before consulting their books?	☐	☐	☐	
57	How did apothecaries typically acquire their knowledge of herbs, spices, and drug preparation?	☐	☐	☐	
58	Why did medieval physicians rarely touch or physically examine their patients during a consultation?	☐	☐	☐	
59	Which of these ingredients was commonly grown in a medieval home garden and used by	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
	women to treat basic coughs and chest ailments?

KT1.2: How did Medieval people try to prevent and treat disease?

Q#	The Target Question	R	A	G	Notes / My Answer
61	What was a major limitation of a medieval apothecary's remedies?	☐	☐	☐	
62	Approximately how many charity hospitals existed in medieval England by the year 1400?	☐	☐	☐	
63	In what way did medieval charity hospitals contribute to public health?	☐	☐	☐	
64	What did medieval surgeons use to try and dull the pain of an amputation, despite the extreme risk of killing the patient?	☐	☐	☐	
65	Why did the medieval medical community believe that academic physicians were of a higher social and intellectual standing than barber-surgeons?	☐	☐	☐	
66	Which Ancient Greek physician originally created the Theory of the Four Humours?	☐	☐	☐	
67	How did the Church explain the cause of disease?	☐	☐	☐	
68	What was 'miasma'?	☐	☐	☐	
69	Why did the Church promote the ideas of Galen?	☐	☐	☐	
70	Explain why astrology was used to diagnose illness in the medieval period.	☐	☐	☐	
71	Recall: Who was Roger Bacon and what was their key contribution to medicine?	☐	☐	☐	
72	In which year did the Black Death first arrive on the shores of England?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
73	What is the actual scientific cause of the Black Death, and how was it primarily spread during the Middle Ages?	☐	☐	☐	
74	Which astrological event in the year 1345 was widely blamed by medieval scholars for causing the Black Death?	☐	☐	☐	
75	What was the name of the hard, painful, pus-filled swellings that appeared in the armpits and groin of Black Death victims?	☐	☐	☐	
76	Which lung-based variant of the plague was spread directly through coughing and sneezing, was 100% fatal, and killed victims much faster?	☐	☐	☐	
77	Why did the religious groups known as 'flagellants' whip themselves publicly in the streets of London?	☐	☐	☐	
78	What natural disaster did medieval people believe had cracked open the earth, releasing the poisonous fumes (miasma) that caused the plague?	☐	☐	☐	
79	Which French physician to the Pope famously advised people to 'Go quickly, go far, and return slowly' to survive the Black Death?	☐	☐	☐	
80	Under the local quarantine rules introduced during the Black Death, how long were travelers new to an area forced to stay away from others?	☐	☐	☐

THE VAULT

Restricted Access: Answer Keys

KT1.1: What did Medieval people believe caused illness?

1. Hippocrates
2. Black bile
3. Blood
4. By creating the Theory of Opposites to treat humoral imbalances with their opposite qualities
5. Because his writings argued the body was perfectly designed by a single 'Creator', fitting Christian theology
6. The Articella
7. As a punishment for sins or as a test of an individual's religious faith
8. An Almanac (astrology chart)
9. The arrival of the Black Death
10. The Miasma theory
11. Because Church doctrine taught that the physical body needed to be buried whole to go to heaven
12. Water; cold and wet
13. To check the internal balance of the patient's four humours
14. Color, thickness, and smell
15. Aristotle
16. By giving them hot, dry foods or spices like hot peppers
17. It hindered progress by preserving and copying only classical texts, preventing challenge to Galen
18. A handbook of medical diagrams and charts used during diagnosis
19. Yellow bile (choler)
20. As a terrifying skin disease sent as a direct punishment from God for sins
21. Public health refers to the health of the population as a whole, especially as monitored and regulated by the state or government.
22. The Ancient Greeks or Ancient Romans.
23. The Church was the central authority in Medieval Europe, controlling education, the copying of books, and holding immense spiritual and political power.
24. Religion could help by encouraging the care of the sick (e.g. hospitals), but hinder progress by relying on supernatural explanations rather than scientific investigation.
25. Ancient ideas were incredibly influential; theories like the Four Humours remained the foundation of medical education and diagnosis.

- 
26. Bloodletting (phlebotomy)
 27. Venesection
 28. For patients who were too young, elderly, or physically weak to withstand a vein being opened
 29. To create a vacuum that would pull blood to the surface of the skin
 30. To expel excess or corrupt humours from the digestive tract using emetics or laxatives
 31. An enema used to clear the bowels, often containing honey, water, and herbal mixtures
 32. A personalized set of rules regarding diet, exercise, sleep, and hygiene written by a physician to help a patient prevent illness
 33. Theriaca
 34. By carrying sweet-smelling herbs, burning incense, or carrying a pomander
 35. To help sweat out excess humours, open the pores, and dissolve impurities in the body
 36. By prescribing cool, wet remedies, such as giving them cucumbers or cold baths
 37. Going on a pilgrimage to a holy shrine containing saintly relics
 38. It was a way to cleanse the soul of sin and shorten a person's time in Purgatory
 39. A poultice
 40. Because they became associated with moral corruption, prostitution, and the spread of diseases like leprosy

KT1.2: How did Medieval people try to prevent and treat disease?

41. Because different foods had specific qualities (hot, cold, wet, dry) that directly influenced and balanced the humours
42. Administering an emetic to induce vomiting
43. Flagellation (whipping themselves to show repentance for sin)
44. Senna
45. To protect the patient through sympathetic magic or transference, believing the gold would draw out the disease
46. A university-trained physician
47. Apothecaries
48. Serving a practical apprenticeship under an experienced master in a guild
49. Because spilling blood was seen as incompatible with a holy, spiritual office
50. Providing basic physical care, warmth, food, and spiritual preparation for the soul
51. Infectious people, pregnant women, and the mentally ill
52. To ensure patients could observe and participate in daily holy Mass from their beds, prioritizing spiritual healing
53. Women in the home, such as mothers, wives, and local wise women
54. Trepanning the skull or setting fractured limbs
55. Because they were extremely expensive and their services were limited to the wealthy and royalty
56. An inspection of the patient's pulse and urine sample
57. Through hands-on experience, trade networks, and passing down secrets from father to son
58. Because they believed medical knowledge was a purely intellectual, book-based science of logical observation
59. Mint and chamomile
60. By monitoring apprenticeships, inspecting workshops, and punishing unlicensed or dangerous practitioners
61. They often mixed ingredients based on astrological alignments or supernatural properties rather than proven clinical trial
62. Over 1,100
63. By providing a clean, warm environment and nutritious food to help vulnerable people recover naturally
64. Herbal mixtures containing highly toxic hemlock, opium, or mandrake
65. Because physicians were university-educated and understood the logical theories of Galen, whereas surgeons were considered manual craftsmen who worked with their hands
66. Hippocrates.
67. The Church taught that illness was a punishment from God for sin, or a test of faith.

68. Miasma was the belief that 'bad air' filled with foul-smelling fumes from rotting matter caused disease.
69. The Church promoted Galen because his idea that the body had a perfect design fit with the Christian belief in a single Creator.
70. Astrology was used because people believed the alignment of planets and stars could negatively impact health, providing a supernatural explanation where science lacked answers.
71. Roger Bacon was a 13th-Century Scientist. An English philosopher and Franciscan friar who emphasized the study of nature through empirical observation. He was imprisoned by Church leaders for suggesting that doctors should conduct their own independent experiments.
72. 1348
73. Yersinia pestis bacteria, carried in the digestive systems of fleas on black rats
74. An unusual alignment of the planets Mars, Jupiter, and Saturn
75. Buboes
76. Pneumonic plague
77. To show God they were sorry for their sins and beg Him to stop the plague
78. A volcanic eruption or earthquake
79. Guy de Chauliac
80. 40 days

KT1.3: How did people respond to the Black Death?

81. Because they believed the foul stench of rotting waste would drive away the plague miasma
82. Because they lacked power, meaning the rich moved freely and the Church ran services as normal
83. Bleeding and purging
84. Cutting open (lancing) the buboes to drain the pus
85. Between 30% and 50% (nearly one-third to one-half)
86. 1349
87. Theriaca
88. Carrying sweet-smelling herbs, flowers, or spices
89. Because those specific administrative preventions occurred only during the 1665 Great Plague
90. Because unhygienic, crowded, and rat-infested living conditions remained completely unchanged
91. The Far East (such as China)
92. Praying, fasting, or going on a pilgrimage.
93. To rebalance the Four Humours by removing excess fluids from the body.
94. People who whipped themselves in public to show God they were sorry for their sins, hoping to avoid disease.
95. Apothecaries mixed herbal remedies and ointments based on the knowledge passed down or from herbal manuals (Materia Medica).
96. They were ineffective at curing disease because they focused on 'care, not cure', often offering prayer and a clean resting place rather than medical intervention.
97. Roger Bacon was a 13th-Century Scientist. An English philosopher and Franciscan friar who emphasized the study of nature through empirical observation. He was imprisoned by Church leaders for suggesting that doctors should conduct their own independent experiments.
