

Guide 02: The Master Cover Engine & Commercial Customizer

Standardized Cover Architecture, Specification Grid & Multi-School Branding

Executive Summary: All printed pupil workbooks and revision guides enforce the **Master Cover Engine** (`scripts/components/render_standard_cover.cjs`). This ensures a dignified, museum-grade aesthetic that complies with the Pearson Edexcel specification while maintaining 100% commercial neutrality for purchasing schools.

 FRONT COVER ARCHITECTURE (PAGE 1)	 BACK COVER ARCHITECTURE (PAGE 16)
Top Departmental Header: Features data-department-name="The History Department", enabling any school to brand the cover. Chronological Banner: Displays Key Topic number, dates, and official Pearson qualification code (e.g. SPECIFICATION 1HI0/2B). Archival Hero Plaque: 120mm landscape historical photograph with accession shelfmark, date, photographer/artist, and institutional repository. Pupil Identification Block: Crisp Name, Class, and Teacher fields with classical hairline borders. 3-Column Specification Breakdown: Direct Pearson specification syllabus points filling the bottom page budget with 0 dead white void.	Assessment Progress Ledger: Formative breakdown of enquiry marks (/26 per topic, /130 total) with benchmark conversion. WWW / EBI Feedback Section: 4-line 7.2mm handwriting lines for teacher formative feedback, SEND adaptations, and pupil response. Teacher Sign-off: Dedicated signature and date approval lines. 5-Code Vector QR Hub: Vector SVGs linking pupils directly to online flashcards, digital quizzes, model answers, and audio narratives. Bottom Folio: Departmental imprint and pagination marker.

COMMERCIAL MULTI-SCHOOL CUSTOMIZER PATTERN

To maintain commercial neutrality, the repository strictly forbids hardcoded school names. Purchasing schools can instantly brand their printed packs via three seamless mechanisms:

```
1. Browser Query Param: Add ?school=St+Peters+Collegiate to the URL.
2. CLI Build Flag: SCHOOL_NAME="St Jude's Academy" node scripts/export_pdfs.cjs cme_new
3. Pure CSS Override: [data-department-name]::after { content: "Your School Name"; }
```
