Pearson Edexcel GCSE (9–1)

Mock Examination

Morning (Time: 1 hour 20 minutes)

Paper reference: 1HI0/11

History

PAPER 1: Thematic study and historic environment

Option 11: Medicine in Britain, c1250–present and The British sector of the Western Front, 1914–18: injuries, treatment and the trenches

You must have:
Sources Booklet (enclosed)

Total
Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- There are two sections in this question paper. Answer all parts of Questions 1 and 2 from Section A. From Section B, answer Questions 3 and 4 and then **EITHER** Question 5 **OR** Question 6.
- Answer the questions in the spaces provided – *there may be more space than you need*.

Information

- The total mark for this paper is 52.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*
- The marks available for spelling, punctuation, grammar and use of specialist terminology are clearly indicated.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

SECTION A: THE BRITISH SECTOR OF THE WESTERN FRONT, 1914–18: INJURIES, TREATMENT AND THE TRENCHES

1 (a) Describe one feature of the clinical use and diagnostic limitations of mobile X-ray units near the frontline.

(2)

1 (b) Describe one feature of trench fever, including its symptoms, cause, or prevention.

(2)

(8)

[illegible]

2 (b) Study Source B. How could you follow up Source B to find out more about the preventative treatments associated with German poison gas attacks? In your answer, you must give the question you would ask and the type of source you could use. Complete the table below.

(4)

Detail in Source B that I would follow up:
Question I would ask:
What type of source I could use:
How this might help answer my question:

(Total for Question 2 = 12 marks)

SECTION B: MEDICINE IN BRITAIN, C1250–PRESENT

- 3 Explain one way in which ideas about the cause of illness in the Medieval period (c1250–c1500) were similar to ideas about the cause of illness in the Renaissance period (c1500–c1700).**

Answer EITHER Question 5 OR Question 6. Spelling, punctuation, grammar and use of specialist terminology will be assessed in this question.

EITHER

5 ‘Edward Jenner’s discovery of the smallpox vaccination was the most significant turning point in the prevention of disease in the period c1700–c1900.’ How far do you agree? Explain your answer.

You **may** use the following in your answer:

- Inoculation
- The 1875 Public Health Act

You **must** also use information of your own.

(16)

OR

6 ‘The discovery of the structure of DNA was the most significant breakthrough in understanding the causes of illness in the period c1900–present.’ How far do you agree? Explain your answer.

You **may** use the following in your answer:

- James Watson and Francis Crick
- Lifestyle factors (e.g., smoking and lung cancer)

You **must** also use information of your own.

(16)

(Total for spelling, punctuation, grammar and use of specialist terminology = 4 marks)

(Total for Question = 20 marks)

Indicate which question you are answering by marking a cross in the box [X].

Handwriting practice lines consisting of multiple sets of three horizontal dashed lines for letter formation.

Sources Booklet

Do not return this Booklet with the question paper.

Sources for use with Section A.

Source A: A clinical extract from an RAMC medical officer logbook at an Advanced Dressing Station (ADS) near Ypres, May 1915.

The men were brought in stumbling, clutching their throats and gasping violently for air. Their eyes were severely inflamed and streaming with tears. We immediately began washing out the blinded eyes of the chlorine gas casualties using simple bicarbonate of soda solutions. It provides some relief, but the respiratory damage is profound. Many will not survive the night.

Source B: A photograph showing Belgian troops wearing early gas masks.

 Visual Source

The photograph shows a group of Belgian soldiers standing outdoors, wearing early protective flannel gas hoods pulled over their heads to protect against chlorine gas attacks.
