

A detailed illustration of a medieval pharmacy or apothecary. The room is filled with shelves of jars and bottles. In the center, a monk is attending to a patient lying down. Other figures are visible in the background, some sitting and some standing. The lighting is warm, coming from candles and a central fire.

Paper 1: Medicine Through Time with the Western Front

"How much did medicine really change in Medieval England?"

MASTERY PACK: MEDIEVAL

Operative / Student Name: _____

Target: Total Recall of 110 Crucial Questions

RESTRICTED ACCESS - MASTER YOUR MEMORY

How to Hack Your Memory

(Rules of Engagement)

1. Never Just Read

Reading the answers feels like learning, but it's an illusion. You must force your brain to struggle to find the answer. The struggle is what builds memory pathways.

2. Cover, Recall, Check

Cover the answer sheet. Write your answer down in the notes section (or say it out loud). Only then are you allowed to check 'The Vault'.

3. Track Your Threat Level

Use the R-A-G (Red, Amber, Green) checkboxes next to every question after you attempt it.

- ☐ **Green:** I nailed it instantly.
- ☐ **Amber:** I got it, but I had to think hard.
- ☐ **Red:** My mind went blank. (Revisit these tomorrow).

4. The Interrogation (Homework Protocol)

True mastery requires testing under pressure. Hand 'The Vault' (answers) to your parent or guardian. They will test you on 20 random questions. They hold the score; they hold the signature.

KT1.1: What did Medieval people believe caused illness?

Q#	The Target Question	R	A	G	Notes / My Answer
1	Who was the Ancient Greek physician credited with creating the Theory of the Four Humours?	☐	☐	☐	
2	In the Theory of the Four Humours, which humour was associated with the season of Autumn, the element of Earth, and the qualities of cold and dry?	☐	☐	☐	
3	Which humour was linked to the temperament 'sanguine' and had the qualities of being hot and wet?	☐	☐	☐	
4	How did the 2nd-century Roman physician Galen develop Hippocrates' original ideas on the humours?	☐	☐	☐	
5	Why did the medieval Christian Church so strongly support and promote Galen's medical ideas?	☐	☐	☐	
6	What was the name of the mid-13th-century medical textbook collection used by students in European universities?	☐	☐	☐	
7	According to the medieval Church's teachings, why did God send diseases like leprosy to humans?	☐	☐	☐	
8	During the medieval period, what did physicians use to determine the best time for treatment based on the positions of the planets?	☐	☐	☐	
9	In medieval England, an unusual planetary alignment of Mars, Jupiter, and Saturn in the year 1345 was widely blamed for causing which disaster?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
10	Which theory suggested that breathing in 'bad air' filled with harmful fumes from swamps, corpses, or rotting matter corrupted the humours?	☐	☐	☐	
11	Why did the Church strictly discourage and prevent medical students and physicians from performing human dissections?	☐	☐	☐	
12	In the Theory of the Four Humours, which element and qualities were associated with Phlegm?	☐	☐	☐	
13	What was the primary purpose of a medieval physician examining a patient's urine?	☐	☐	☐	
14	Which three characteristics of a urine sample did medieval physicians check on a urine chart wheel?	☐	☐	☐	
15	Which ancient Greek philosopher's work on logic and observation was studied by medieval medical students alongside the works of Galen?	☐	☐	☐	
16	In the context of the Theory of Opposites, how would a medieval physician treat a patient who had a cold, wet fever (excess phlegm)?	☐	☐	☐	
17	How did the Church's total control over education and book production affect medical progress in the Middle Ages?	☐	☐	☐	
18	What was the 'Vademecum' carried by medieval physicians?	☐	☐	☐	
19	In the Theory of the Four Humours, the liver was associated with which humour?	☐	☐	☐	
20	How was leprosy viewed by the medieval Church and population?	☐	☐	☐

KT1.2: How did Medieval people try to prevent and treat disease?

Q#	The Target Question	R	A	G	Notes / My Answer
41	If a patient was suffering from a hot and dry illness, such as a fever, how would a physician apply the Theory of Opposites to treat them?	☐	☐	☐	
42	What religious act was commonly undertaken by sick medieval people to show repentance for their sins and beg God for a miraculous physical cure?	☐	☐	☐	
43	What did the medieval Church teach was the spiritual value of enduring physical pain and illness?	☐	☐	☐	
44	Which herbal preparation involved crushing medicinal plants and applying them directly to the skin to draw out poisons or ease pain?	☐	☐	☐	
45	Why did public baths ('stewes') in England begin to close down toward the end of the medieval period?	☐	☐	☐	
46	In the context of humoral medicine, why did physicians pay close attention to what patients ate and drank?	☐	☐	☐	
47	What was the primary method of purging a patient if the physician believed the excess humour was located in the upper stomach?	☐	☐	☐	
48	What spiritual practice did extreme religious groups perform publicly during crises to appease God's anger and prevent disease?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
49	Which of these was a common laxative plant used in medieval England to purge the bowels?	☐	☐	☐	
50	What was the purpose of keeping a piece of amber or gold near a patient suffering from certain illnesses?	☐	☐	☐	
51	Which medical practitioner in medieval England attended university for up to ten years, was licensed to diagnose illness, but rarely carried out physical treatment himself?	☐	☐	☐	
52	Which group of medieval medical practitioners mixed herbal remedies, sold spices, and were often viewed as a cheaper alternative to expensive physicians?	☐	☐	☐	
53	What training route did medieval barber-surgeons take to learn their craft, such as performing amputations or pulling teeth?	☐	☐	☐	
54	Why did the medieval Catholic Church strictly ban monks and priests from performing surgeries that involved shedding blood?	☐	☐	☐	
55	In a typical medieval hospital run by the Church, what was the primary focus of the monastic staff?	☐	☐	☐	
56	Which of the following groups of patients would be systematically turned away and rejected from entering a medieval charity hospital?	☐	☐	☐

KT1.3: How did people respond to the Black Death?

Q#	The Target Question	R	A	G	Notes / My Answer
81	In which year did the Black Death first arrive on the shores of England?	☐	☐	☐	
82	What is the actual scientific cause of the Black Death, and how was it primarily spread during the Middle Ages?	☐	☐	☐	
83	Which astrological event in the year 1345 was widely blamed by medieval scholars for causing the Black Death?	☐	☐	☐	
84	What was the name of the hard, painful, pus-filled swellings that appeared in the armpits and groin of Black Death victims?	☐	☐	☐	
85	Which lung-based variant of the plague was spread directly through coughing and sneezing, was 100% fatal, and killed victims much faster?	☐	☐	☐	
86	Why did the religious groups known as 'flagellants' whip themselves publicly in the streets of London?	☐	☐	☐	
87	What natural disaster did medieval people believe had cracked open the earth, releasing the poisonous fumes (miasma) that caused the plague?	☐	☐	☐	
88	Which French physician to the Pope famously advised people to 'Go quickly, go far, and return slowly' to survive the Black Death?	☐	☐	☐	
89	Under the local quarantine rules introduced during the Black Death, how long were travelers new to an area forced to stay away from others?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
90	Why did local authorities in some medieval towns deliberately stop sweeping and cleaning the streets during the Black Death?	☐	☐	☐	
91	Why were medieval local governments largely unsuccessful in fully enforcing quarantine laws during the 1348 epidemic?	☐	☐	☐	
92	Which traditional treatment did medieval physicians try on Black Death patients that actually made them die more quickly?	☐	☐	☐	
93	Which treatment occasionally allowed a Black Death patient to survive if it was done successfully by a barber-surgeon?	☐	☐	☐	
94	Approximately what percentage of the English population is estimated to have died during the Black Death epidemic of 1348-49?	☐	☐	☐	
95	In which year did King Edward III write his famous letter to the Mayor of London complaining about the filthy, death-carrying air of the city?	☐	☐	☐	
96	Which popular, spice-based medieval medicine containing up to 70 ingredients (including opium) was prescribed as an antidote during the Black Death?	☐	☐	☐	
97	Which of the following was a common way people tried to prevent 'bad air' (miasma) from entering their bodies during the Black Death?	☐	☐	☐	
98	Why is it historically incorrect to write about 'searchers', 'red crosses on doors', or 'killing 40,000 dogs' in a GCSE answer about the 1348 Black Death?	☐	☐	☐	

Q#	The Target Question	R	A	G	Notes / My Answer
99	Why did the plague return to England periodically every 10 to 20 years after the first 1348 outbreak?	☐	☐	☐	
100	Where do historians believe the Black Death first broke out before traveling along trade routes to Sicily, Europe, and finally England?	☐	☐	☐

THE VAULT

Restricted Access: Answer Keys

KT1.1: What did Medieval people believe caused illness?

1. Hippocrates
2. Black bile
3. Blood
4. By creating the Theory of Opposites to treat humoral imbalances with their opposite qualities
5. Because his writings argued the body was perfectly designed by a single 'Creator', fitting Christian theology
6. The Articella
7. As a punishment for sins or as a test of an individual's religious faith
8. An Almanac (astrology chart)
9. The arrival of the Black Death
10. The Miasma theory
11. Because Church doctrine taught that the physical body needed to be buried whole to go to heaven
12. Water; cold and wet
13. To check the internal balance of the patient's four humours
14. Color, thickness, and smell
15. Aristotle
16. By giving them hot, dry foods or spices like hot peppers
17. It hindered progress by preserving and copying only classical texts, preventing challenge to Galen
18. A handbook of medical diagrams and charts used during diagnosis
19. Yellow bile (choler)
20. As a terrifying skin disease sent as a direct punishment from God for sins
21. The health of the population as a whole, especially as monitored and regulated by the state.
22. The Ancient Greeks.
23. Hippocrates.
24. Galen.
25. Blood, phlegm, yellow bile, black bile.
26. Bad air or noxious smells believed to cause disease.
27. God sent disease as a punishment for sin or to test faith.

- 
28. Galen's ideas fit Christian beliefs because he argued the body was created by a single Creator.
 29. Physicians used star charts and planetary alignments to diagnose illness and plan treatments.
 30. To check the colour, taste, and smell of urine to identify humour imbalances.
 31. Bloodletting (phlebotomy)
 32. Venesection
 33. For patients who were too young, elderly, or physically weak to withstand a vein being opened
 34. To create a vacuum that would pull blood to the surface of the skin
 35. To expel excess or corrupt humours from the digestive tract using emetics or laxatives
 36. An enema used to clear the bowels, often containing honey, water, and herbal mixtures
 37. A personalized set of rules regarding diet, exercise, sleep, and hygiene written by a physician to help a patient prevent illness
 38. Theriaca
 39. By carrying sweet-smelling herbs, burning incense, or carrying a pomander
 40. To help sweat out excess humours, open the pores, and dissolve impurities in the body

KT1.2: How did Medieval people try to prevent and treat disease?

41. By prescribing cool, wet remedies, such as giving them cucumbers or cold baths
42. Going on a pilgrimage to a holy shrine containing saintly relics
43. It was a way to cleanse the soul of sin and shorten a person's time in Purgatory
44. A poultice
45. Because they became associated with moral corruption, prostitution, and the spread of diseases like leprosy
46. Because different foods had specific qualities (hot, cold, wet, dry) that directly influenced and balanced the humours
47. Administering an emetic to induce vomiting
48. Flagellation (whipping themselves to show repentance for sin)
49. Senna
50. To protect the patient through sympathetic magic or transference, believing the gold would draw out the disease
51. A university-trained physician
52. Apothecaries
53. Serving a practical apprenticeship under an experienced master in a guild
54. Because spilling blood was seen as incompatible with a holy, spiritual office
55. Providing basic physical care, warmth, food, and spiritual preparation for the soul
56. Infectious people, pregnant women, and the mentally ill
57. To ensure patients could observe and participate in daily holy Mass from their beds, prioritizing spiritual healing
58. Women in the home, such as mothers, wives, and local wise women
59. Trepanning the skull or setting fractured limbs
60. Because they were extremely expensive and their services were limited to the wealthy and royalty
61. An inspection of the patient's pulse and urine sample
62. Through hands-on experience, trade networks, and passing down secrets from father to son
63. Because they believed medical knowledge was a purely intellectual, book-based science of logical observation
64. Mint and chamomile
65. By monitoring apprenticeships, inspecting workshops, and punishing unlicensed or dangerous practitioners
66. They often mixed ingredients based on astrological alignments or supernatural properties rather than proven clinical trial
67. Over 1,100
68. By providing a clean, warm environment and nutritious food to help vulnerable people recover naturally
69. Herbal mixtures containing highly toxic hemlock, opium, or mandrake

70. Because physicians were university-educated and understood the logical theories of Galen, whereas surgeons were considered manual craftsmen who worked with their hands
71. Galen.
72. God sent disease as a punishment for sin or to test faith.
73. Bad air or noxious smells believed to cause disease.
74. To restore balance to the four humours by releasing excess blood.
75. Preparing and selling herbal remedies and potions.
76. They provided shelter and care, not medical treatment.
77. The health of the population as a whole, especially as monitored and regulated by the state.
78. The Ancient Greeks.
79. With cold treatments like cucumber or cool baths.
80. Using laxatives or emetics to clear the digestive system.

KT1.3: How did people respond to the Black Death?

81. 1348
82. Yersinia pestis bacteria, carried in the digestive systems of fleas on black rats
83. An unusual alignment of the planets Mars, Jupiter, and Saturn
84. Buboes
85. Pneumonic plague
86. To show God they were sorry for their sins and beg Him to stop the plague
87. A volcanic eruption or earthquake
88. Guy de Chauliac
89. 40 days
90. Because they believed the foul stench of rotting waste would drive away the plague miasma
91. Because they lacked power, meaning the rich moved freely and the Church ran services as normal
92. Bleeding and purging
93. Cutting open (lancing) the buboes to drain the pus
94. Between 30% and 50% (nearly one-third to one-half)
95. 1349
96. Theriaca
97. Carrying sweet-smelling herbs, flowers, or spices
98. Because those specific administrative preventions occurred only during the 1665 Great Plague
99. Because unhygienic, crowded, and rat-infested living conditions remained completely unchanged
100. The Far East (such as China)
101. To restore balance to the four humours by releasing excess blood.
102. Preparing and selling herbal remedies and potions.
103. They provided shelter and care, not medical treatment.
104. 1348.
105. People who whipped themselves to show penance to God.
106. Carrying sweet-smelling herbs or lighting fires.
107. Galen.
108. Bad air or noxious smells believed to cause disease.
109. A painful swelling in the armpit or groin, a symptom of the plague.
110. Cleaning streets and stopping visitor trade.
